How to change the URL server on Tizen screen

Step 1

With the remote control, press the “Home” button.

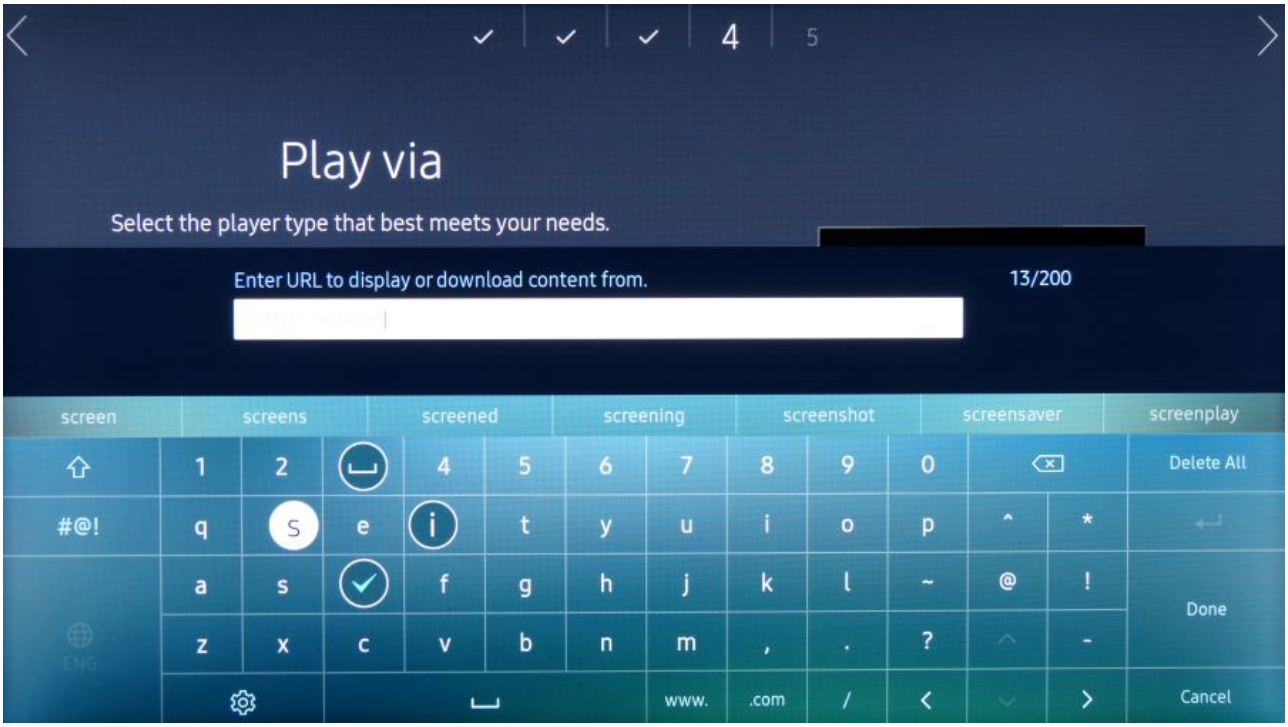

Etape 2

When you have this menu, select the “URL LAUNCHER - Settings” (2nd item).

Etape 3

- When you are on “URL LAUNCHER”, enter the server URL using the virtual keyboard.
  - Don't forget to enter “http:*” ou “https:*”. The characters ':' and '/' can be entered using the “@#!” key on the virtual keyboard.

Etape 4

- When you have set the URL, press “DONE” on the virtual keyboard.
- press “HOME” button.
- Select “URL Launcher” (1st button), the Zebrix application will be downloaded and will start up.
