How to Deploy a Philips Epaper Screen (Android) under Zebrix

Step 1: Install Zebrix

Install Script download: https://downloads.zebrix.net/zebrix-epaper-install.zip

• Double click installandroidepaper.bat

Step 2: Select "Zebrix Signage" as the Default Application

Click on the "BootApp" application from the device interface via screencopy

Choose "zebrix signage" as the default application

Go to the device's applications and uninstall EPDApp (manufacturer's recommendation for commercial use)

Finally, return to the list of applications and launch the "zebrix signage" app

Step 3: Configure Date/Time

Step 4: Configure the Network (Wi-Fi)

From the device interface (with screencopy):

Go to Settings

Then go to Network & Internet

And search for the associated network

Return to the list of applications and launch "zebrix signage"
