

## Screen already in use: factory reset recommended

- Press the settings button on the remote control (cogwheel icon)
- Go to **admin**
- Enter pin code (default: 000000)
- Reset to factory, **the screen will go blank ===== New screen or first start-up after reset to factory settings ===== - Select Quickstart / Normal Configuration. - Configuration of screen rotation language, input rotation activation, source: adapt if necessary (default settings can be kept as they are). - Date and time configuration required! - Done**

**DATE / TIME:** It is very important to correctly **configure at least the correct date**, otherwise the first connection to zebrix in HTTPS will be impossible (certificate verification requires a correct date)
