

Deploying Zebrix on Chrome OS

You can deploy Zebrix on one or multiple Chromeboxes

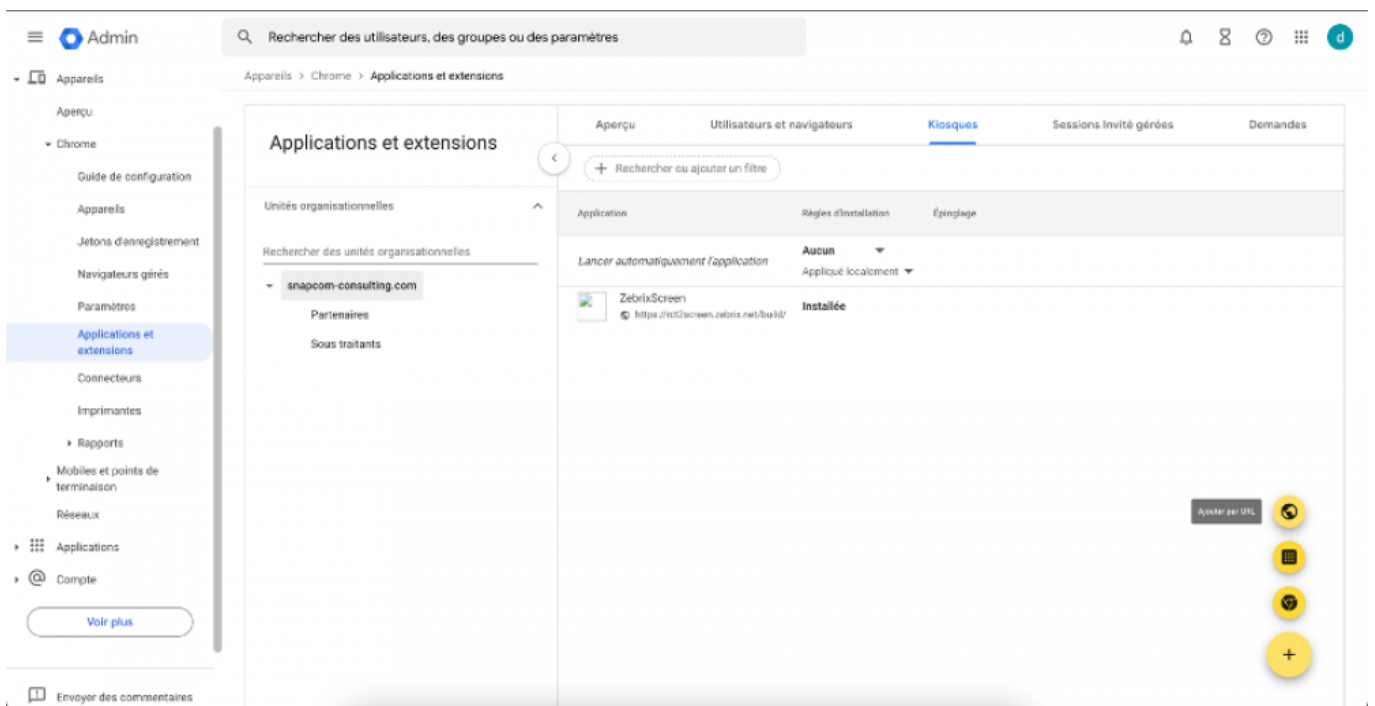

Add Zebrix on ChromeOS devices

Go to the Admin Console.

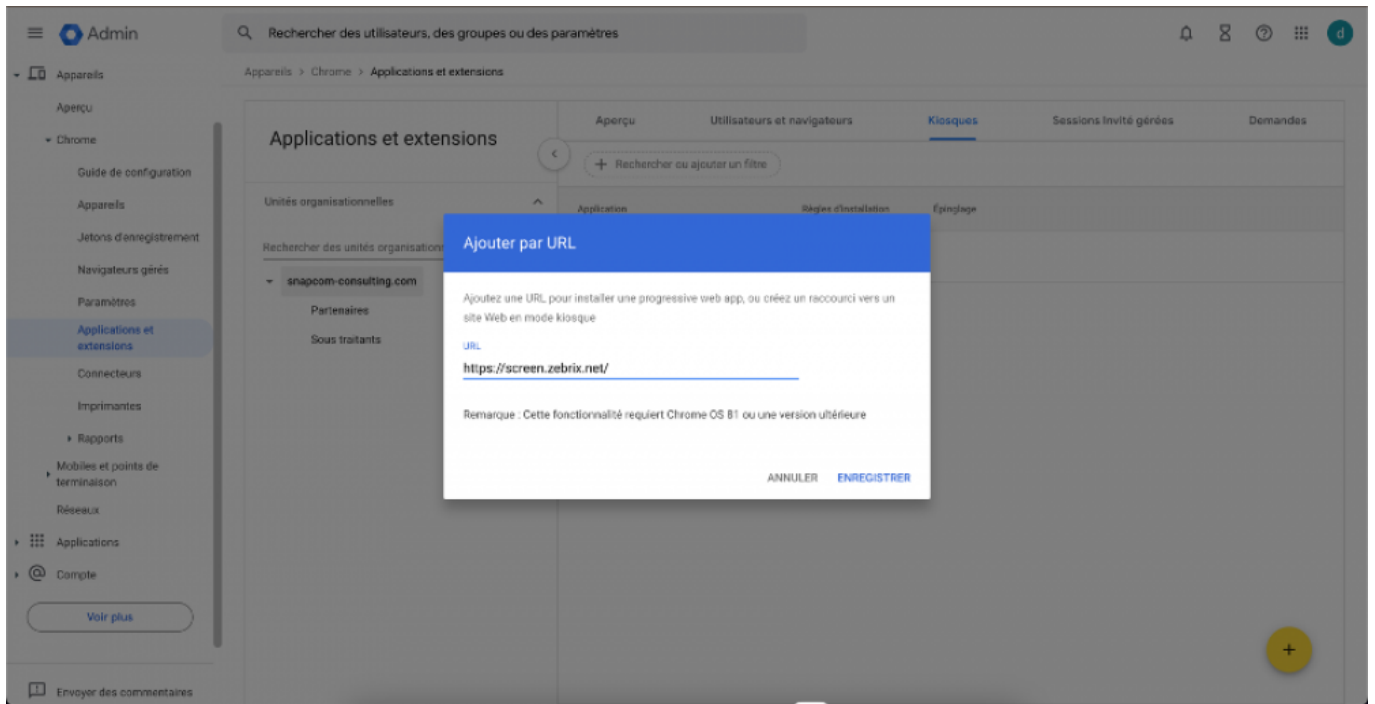

Navigate to Devices > Chrome.

Click on Apps & Extensions > Kiosks.

Click the “+” button at the bottom right and select “Add by URL”

Add the following URL: <https://screen.zebrix.net/>

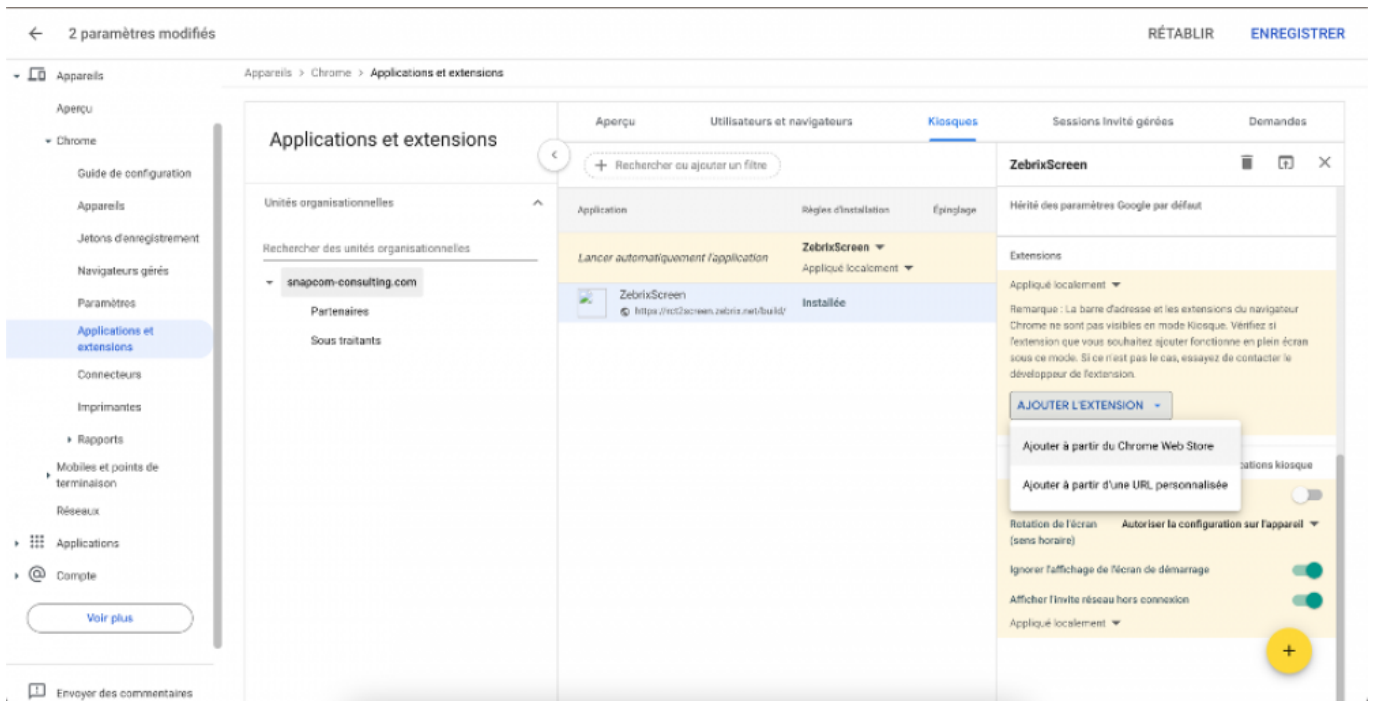

Add the Zebrix extension to access the ChromeOS environment:

Click on the Zebrix app

Find the “Extensions” section in the right-hand menu

[Click “Add from Chrome Web Store”](#)

Automatically launch Zebrix in kiosk mode on ChromeOS devices

Go to the Admin Console.

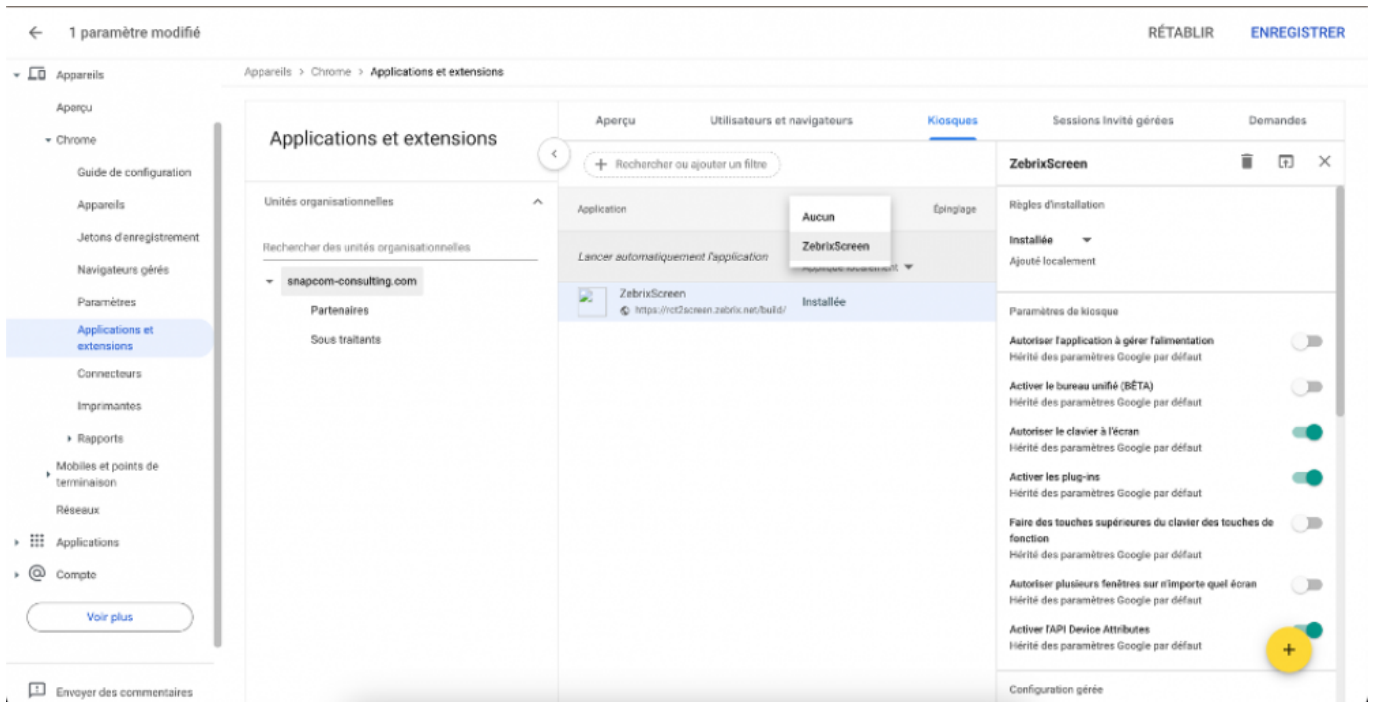

Navigate to Devices > Chrome.

Click on Apps & Extensions > Kiosks.

To apply the setting to all users, ensure the root organizational unit is selected. Otherwise, select a child organizational unit.

Next to Auto-launch app, select the app you want to enable for automatic launch on ChromeOS devices.

Click Save and restart the device
