

# How do you integrate a Google Slides presentation into a zebrix page?

## Creating and publishing your Google Slides presentation

1. Create your Google Slides presentation or open your existing presentation 
2. File > **Publish to the web**  - In the **Publish** tab, specify the display duration per slide, and tick the automatic restart at the end of the slideshow. - Copy the publication URL  ===== Adapt the publication URL ===== - In order to work, you need to adapt the URL slightly. Replace the word pub with embed and add &rm=minimal at the end of the URL (this will hide the slideshow control buttons at the bottom of the slides).
