

How to Deploy a Philips Epaper Screen (Android) under Zebrix

Step 1: Install Zebrix

Install Script download:

<https://downloads.zebrax.net/zebrax-epaper-install.zip>

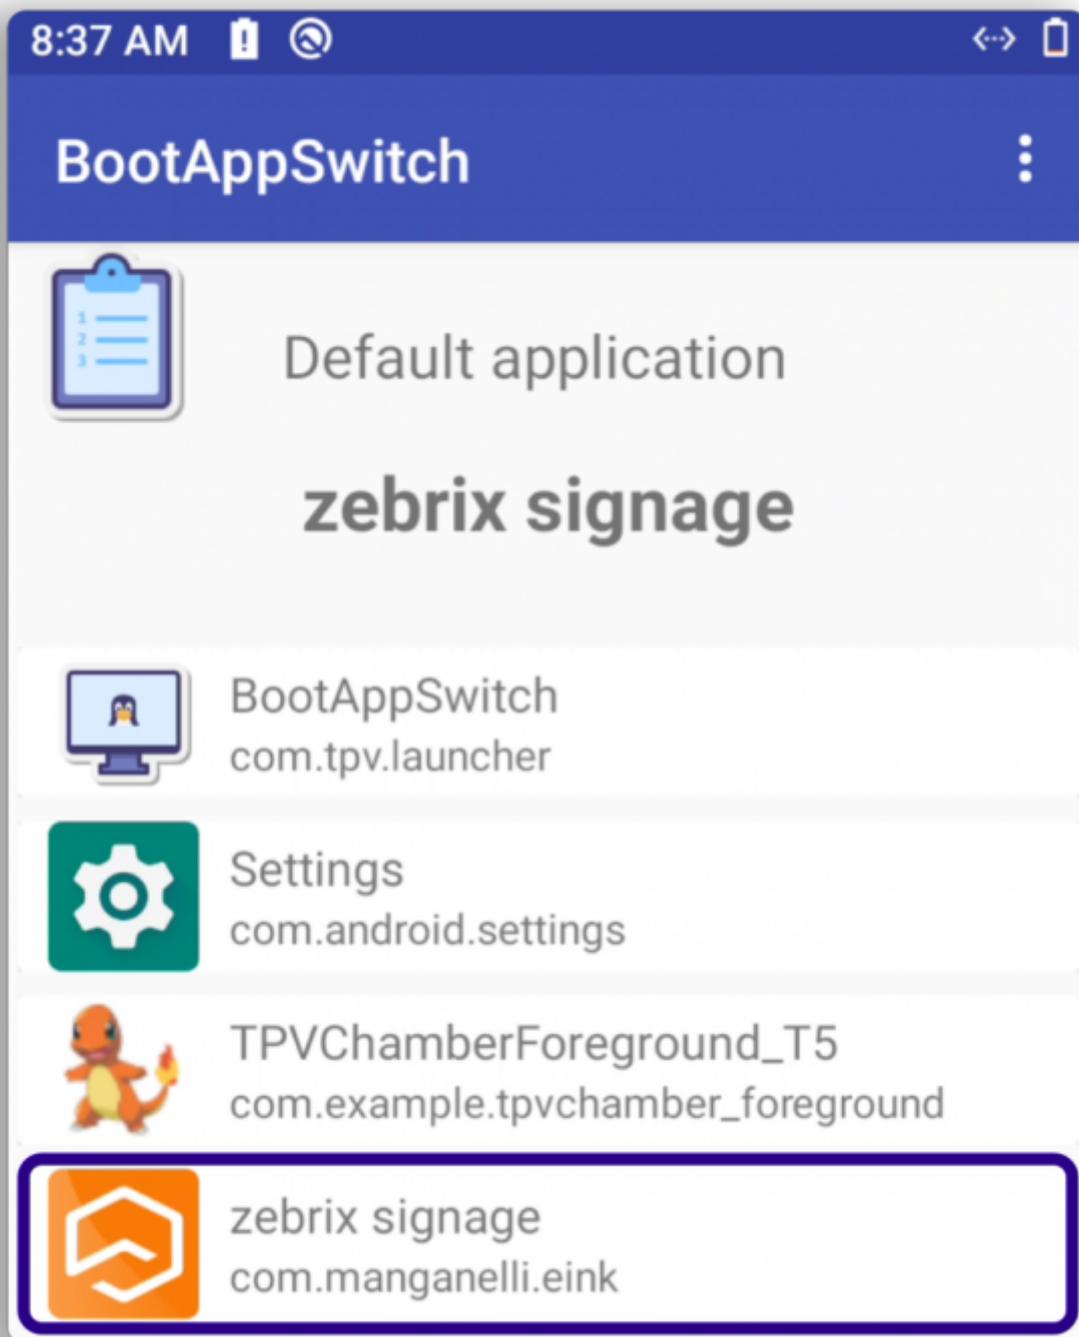

- Double click `installandroidepaper.bat`

Step 2: Select "Zebrix Signage" as the Default Application

Click on the "BootApp" application from the device interface via screencopy

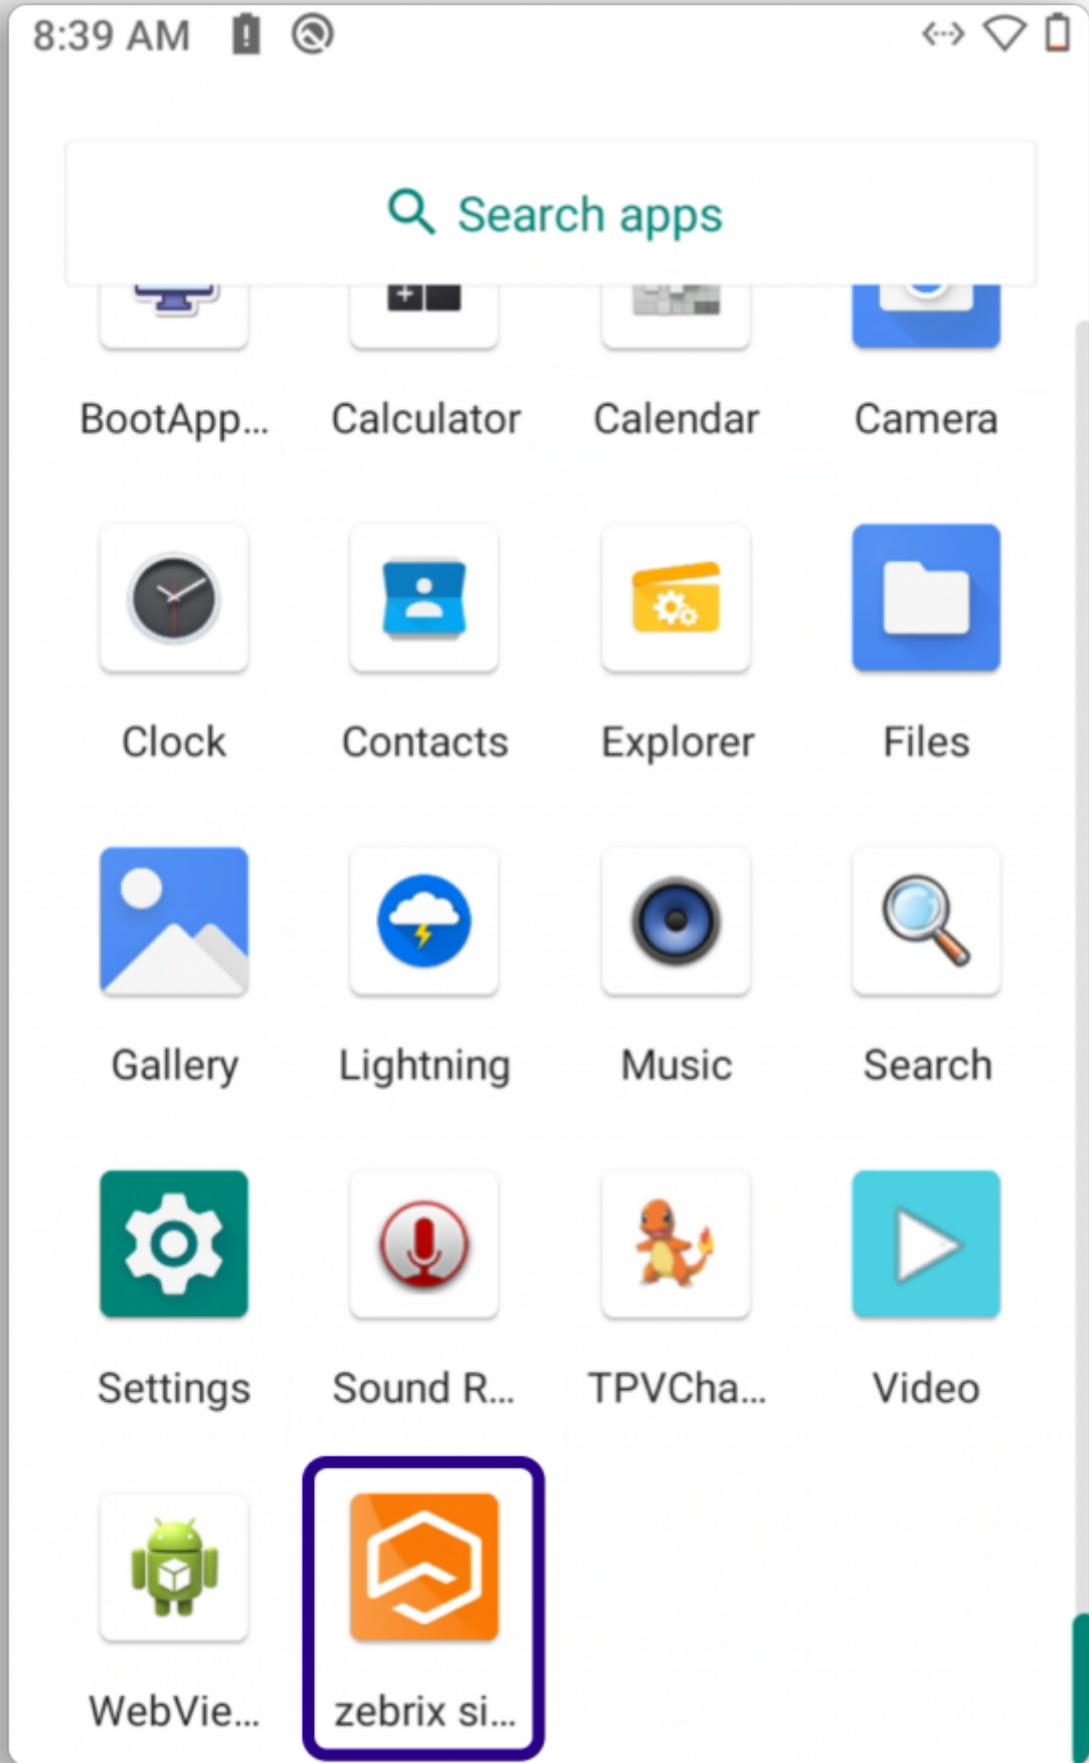

Choose “zebrix signage” as the default application

Go to the device's applications and uninstall EPDApp (manufacturer’s recommendation for commercial use)

Finally, return to the list of applications and launch the “zebrix signage” app

Step 3: Configure Date/Time

Configure the screen time zone: Press the settings button in the application.

Press System.

Then press Date & time.

Next, press time zone.

Press Region, then select the country where the screen is located. Check the corresponding time zone in time zone. Playlists are no longer being broadcast on any screens.

Step 4: Configure the Network (Wi-Fi)

[From the device interface \(with screencopy\):](#)

[Go to Settings](#)

Then go to [Network & Internet](#)

And search for the associated network

[Return to the list of applications and launch “zebrix signage”](#)
