

Google Documents in zebrix

Introduction

zebrix now offers the possibility to access your Google Drive™ content:

Import your images or videos into your zebrix media library

Embed your Google Docs, Spreadsheets, and Slides

This second option requires, for professional and educational Google accounts, an adjustment of Google user permissions.

Privacy Policy

 Using this option requires granting the zebrix application access to your Google Drive. To reassure you about how this access will be used, we invite you to [visit this page](#).
