

⚠ Note: This feature is only available on devices running version V3.

Timezone

This guide explains how zebrix deals with time and more precisely the timezones.

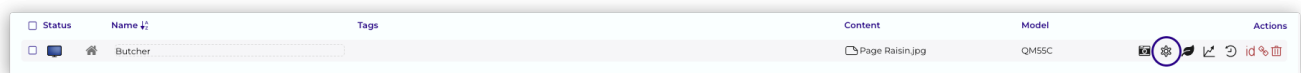

General information

- Zebrix automatically sets the time in the screen at each startup. (It is therefore unnecessary to adjust the time via the screen menu)
- The time displayed in the menu is always set to GMT (Greenwich Mean Time +00h00) whatever the timezone that is chosen. - Zebrix is in charge of transforming the GMT time into the correct local time, thanks to the TimeZone configured on the CMS (see below)
- Go to “Hardware Tools” on the concerned device, then “Monitor”. The local date/time of the screen corresponds to the time translated by zebrix which is the correct local time (GMT time + the time difference applied on it thanks to the timezone that has been chosen).
- The time that is displayed in a “date/time” zone on the pages assigned to the screen is identical to this local date.

How to Change the Time Zone

This guide explains how to modify the time zone.

How to Change the Time Zone on a Screen

Select the screens on which you want to apply a different time zone.

Click on “Hardware Tools”.

Go to the “Properties” tab.

Select the desired time zone, then click on “Apply”.

The screenshot shows the 'Hardware Tools' interface with a dropdown menu open for selecting a time zone. The interface has a purple header with the text 'Hardware Tools: 1 Screen selected - Butcher'. Below the header are tabs for 'Remote', 'Logs', 'Monitor', and 'Properties'. The 'Properties' tab is active, showing sections for 'General Parameters', 'Regional settings', 'Image settings', and 'Network settings'. The 'Regional settings' section includes 'Language:' and 'Timezone:'. The dropdown menu lists various time zones, with '(GMT+01:00) Europe/Paris' highlighted in blue. A red 'X' button is visible at the bottom right of the dropdown menu.

How to Change the Time Zone of a Customer Account

It is possible to modify the time zone at the customer account level. This setting will be used as the default time zone for all new screens/players added to this account.

Go to the account's general settings and select the desired time zone.

How to Check the Configuration on a Screen

Press the "Tools" button on the remote control.
