

SSO implementation in zebrix with Azure AD

Save zebrix metadata in a file

1. Surf on <https://auth.zebrix.net/metadata>
2. Right click and save the file to a file with .xml extension

In the Azure AD admin center, add a new app

Create a new app using these options and call it zebrix

zebrix overview

Azure Active Directory admin center

Dashboard > Enterprise applications > zebrix | Overview

Enterprise Application

Properties

Name: zebrix

Application ID: [redacted]

Object ID: [redacted]

Getting Started

- 1. Assign users and groups**
Provide specific users and groups access to the applications
[Assign users and groups](#)
- 2. Set up single sign on**
Enable users to sign into their application using their Azure AD credentials
[Get started](#)

Choose which groups/users will be allowed to login

Azure Active Directory admin center

Dashboard > Enterprise applications > zebrix

zebrix | Users and groups

Enterprise Application

Manage

- Overview
- Deployment Plan
- Properties
- Owners
- Roles and administrators (Preview)
- Users and groups**
- Single sign-on

Actions: + Add user/group, Edit, Remove, Update Credentials, Columns

The application will appear on the Access Panel for assigned users. Set 'visible to users?' to no

First 100 shown, to search all users & groups, enter a display name.

Display Name	Object Type
No application assignments found	

Set up single sign-on : choose SAML

Upload previously downloaded file to portal

Save the basic SAML configuration

Skip SSO login test

Edit User attributes and claims
