SSO implementation in zebrix with Azure AD (Office 365)

Save zebrix metadata in a file

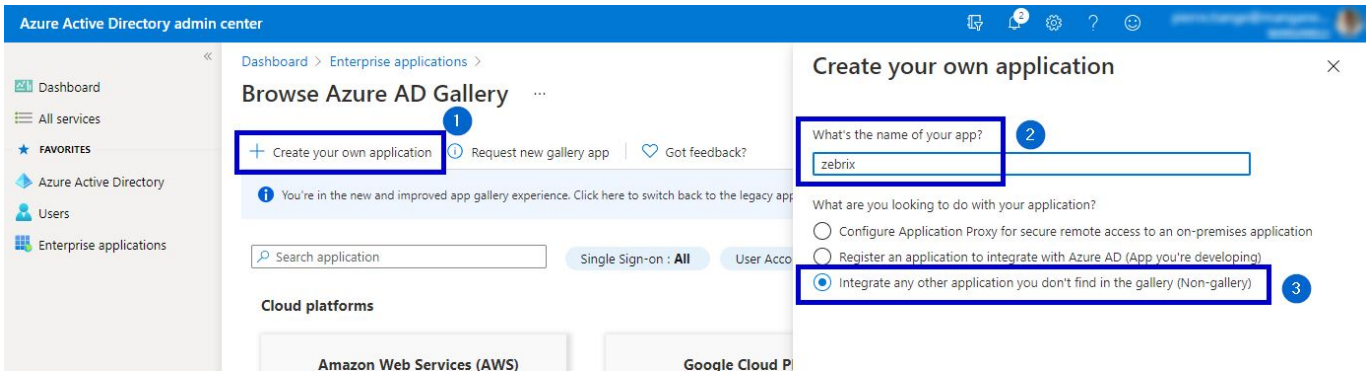

1. Surf on https://auth.zebrix.net/metadata
2. Right click and save the file to a file with .xml extension

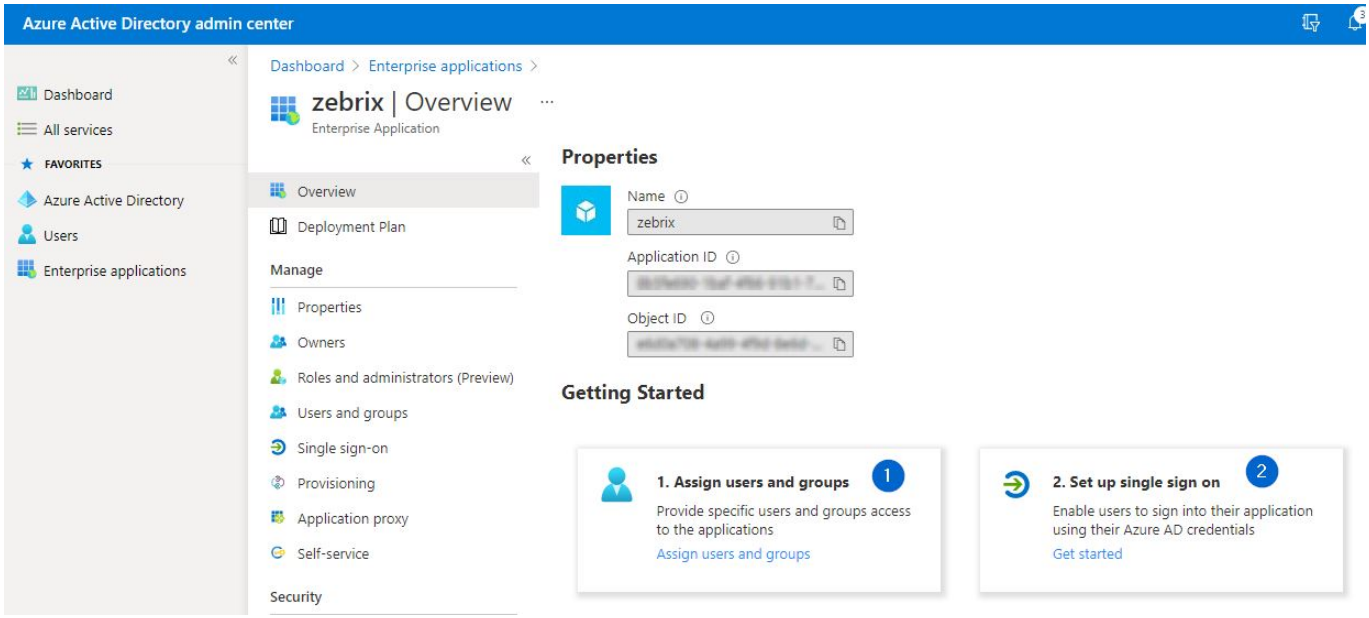

In the Azure AD admin center, add a new app

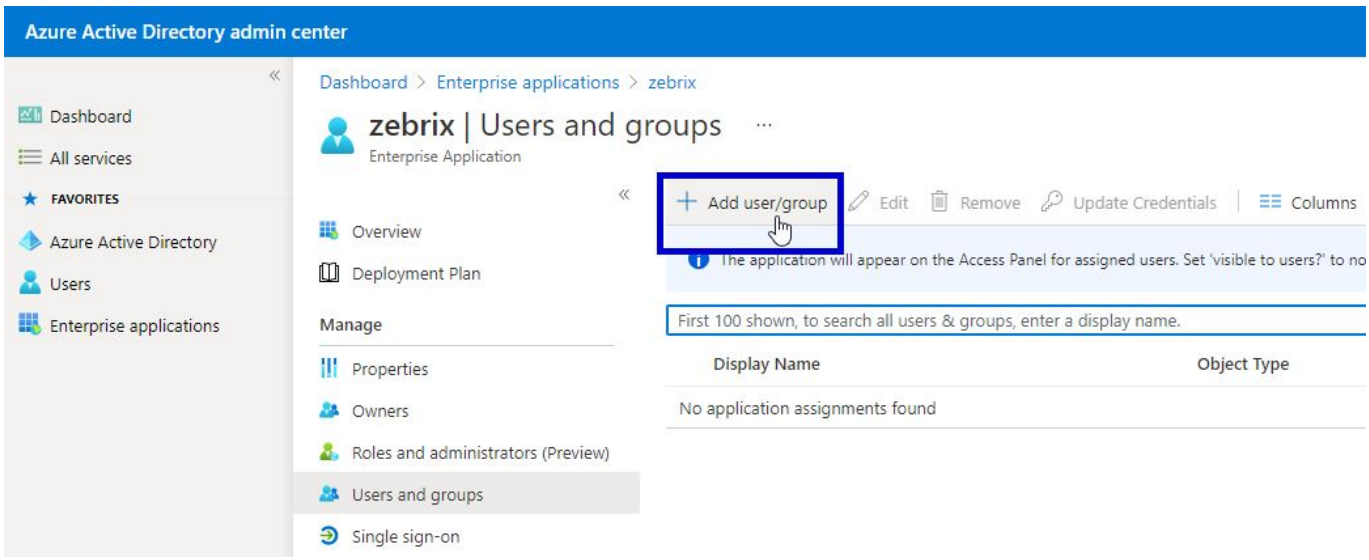

Create a new app using these options and call it "zebrix" or "zebrix CMS"

zebrix overview

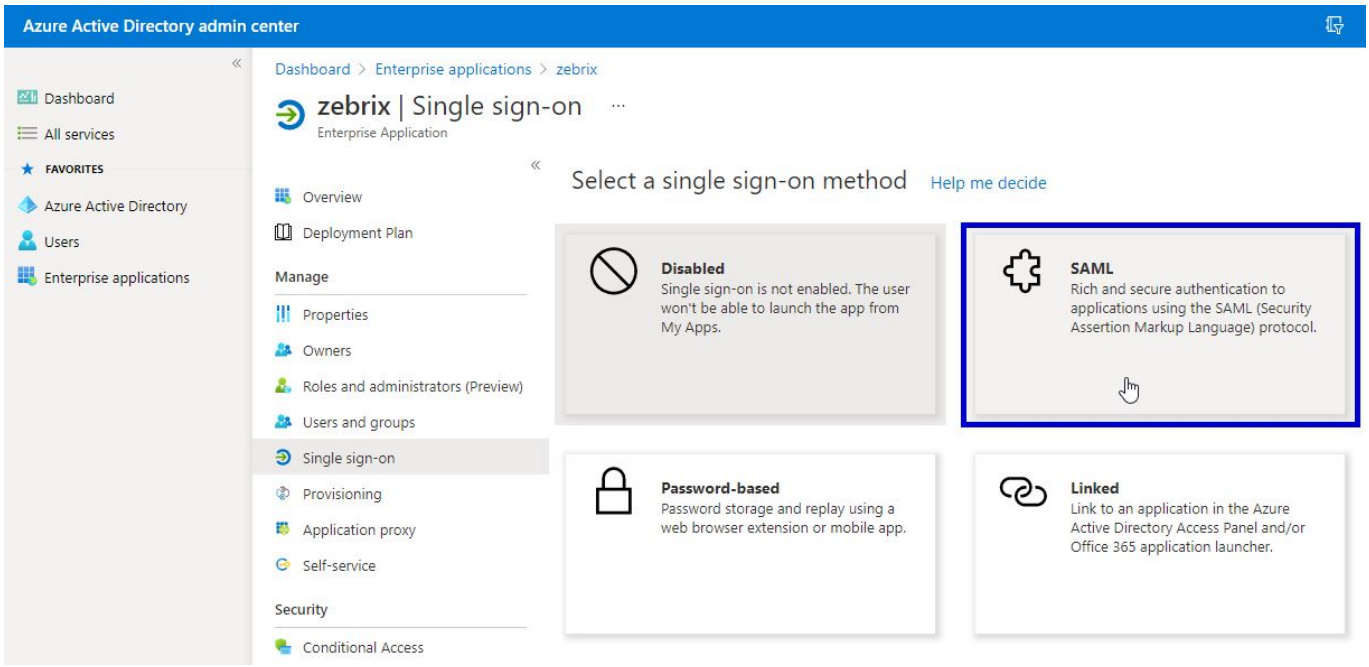

Choose which groups/users will be allowed to login

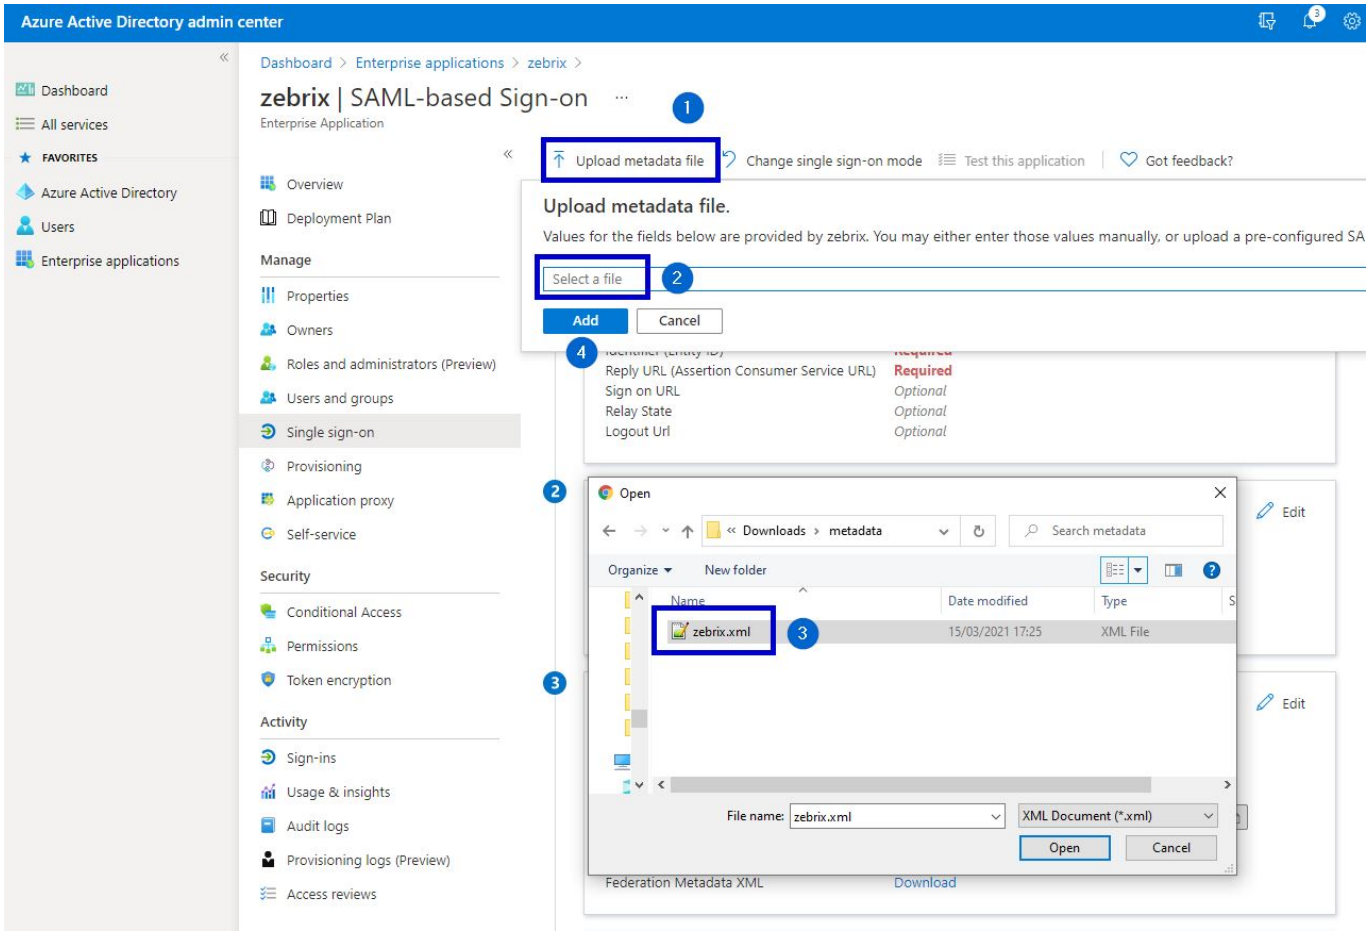

Set the zebrix logo

Save the following logo

Set up single sign-on : choose SAML

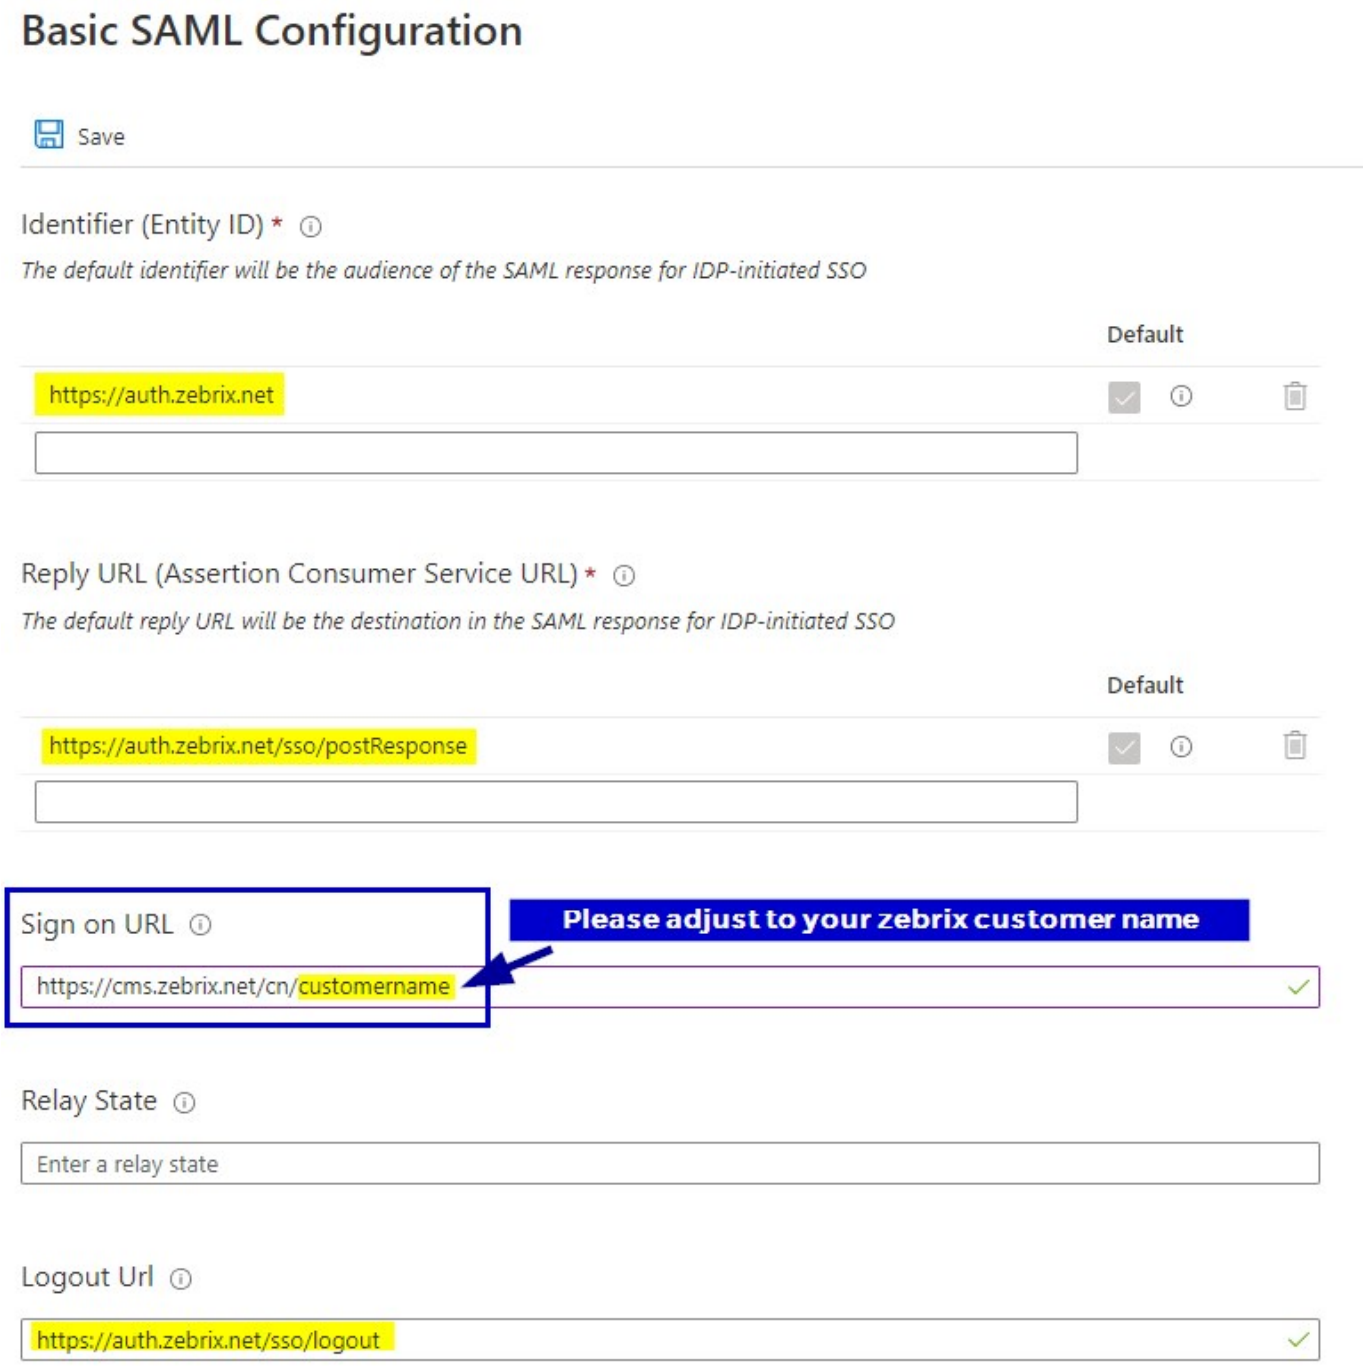

Upload previously downloaded file to portal

Add a "Sign On URL" and save the basic SAML configuration

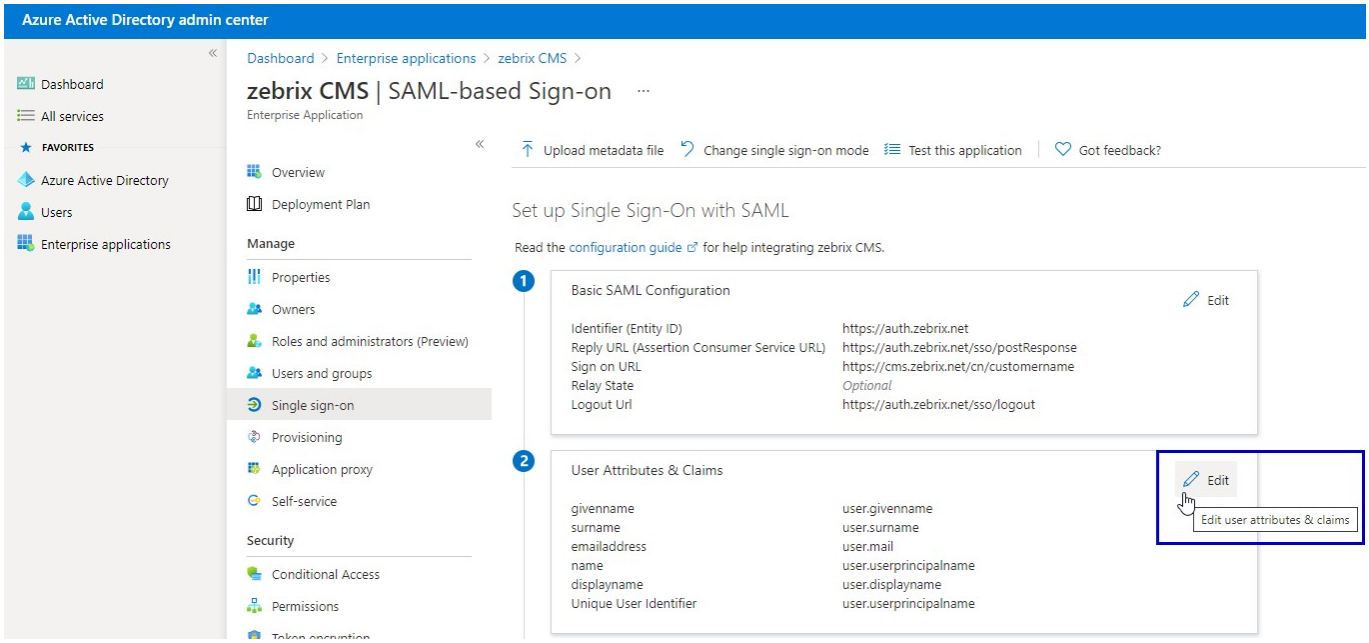

Some fields will be prefilled thanks to the imported .XML file, but the “Sign On URL” needs to be filled manually. Please specify the following URL: **https://cms.zebrix.net/cn/customername** (please replace **customername** with your actual customer name on zebrix)

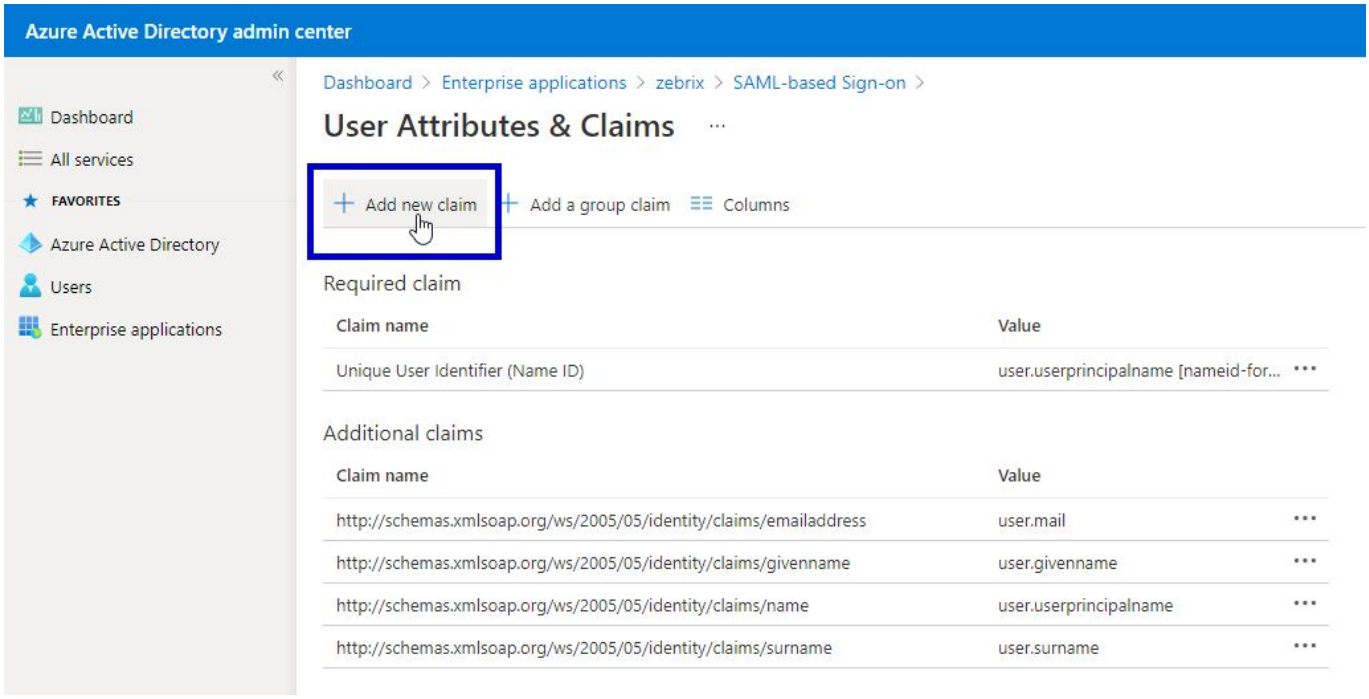

Skip SSO login test

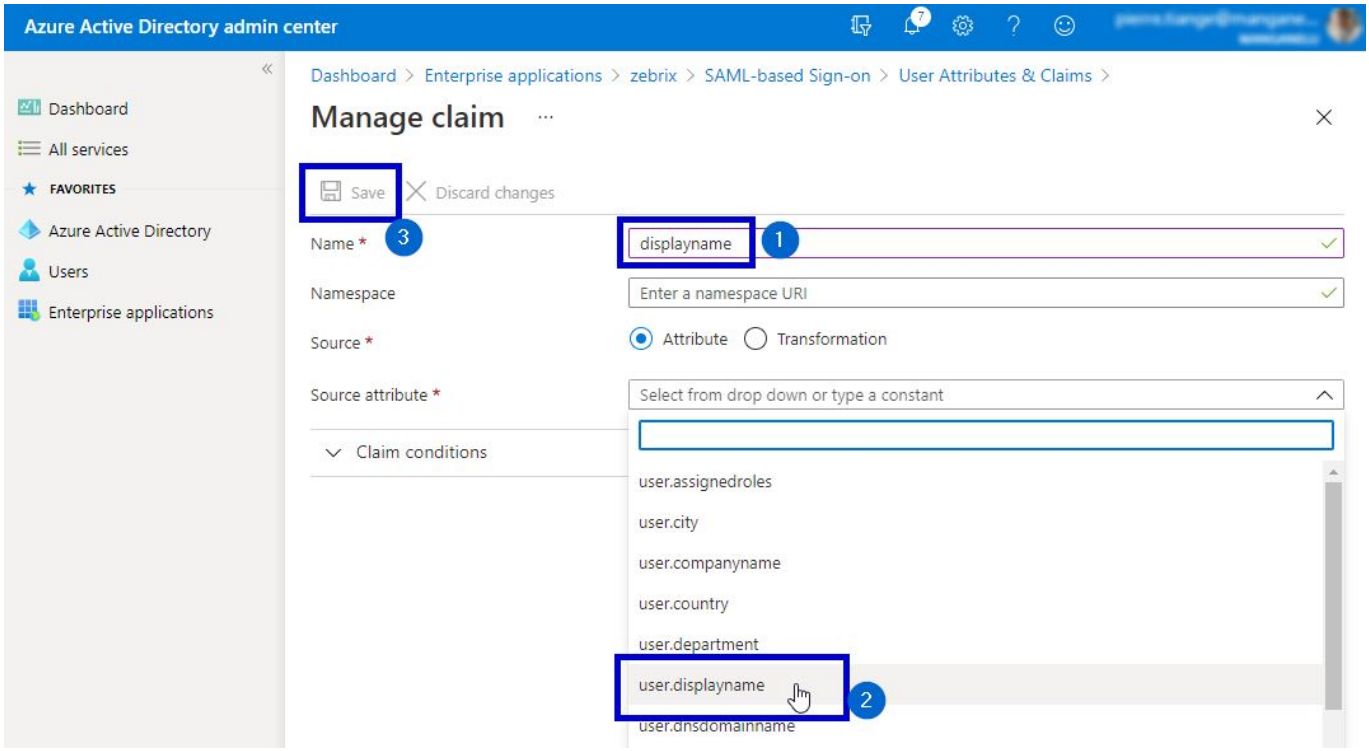

Edit User attributes and claims

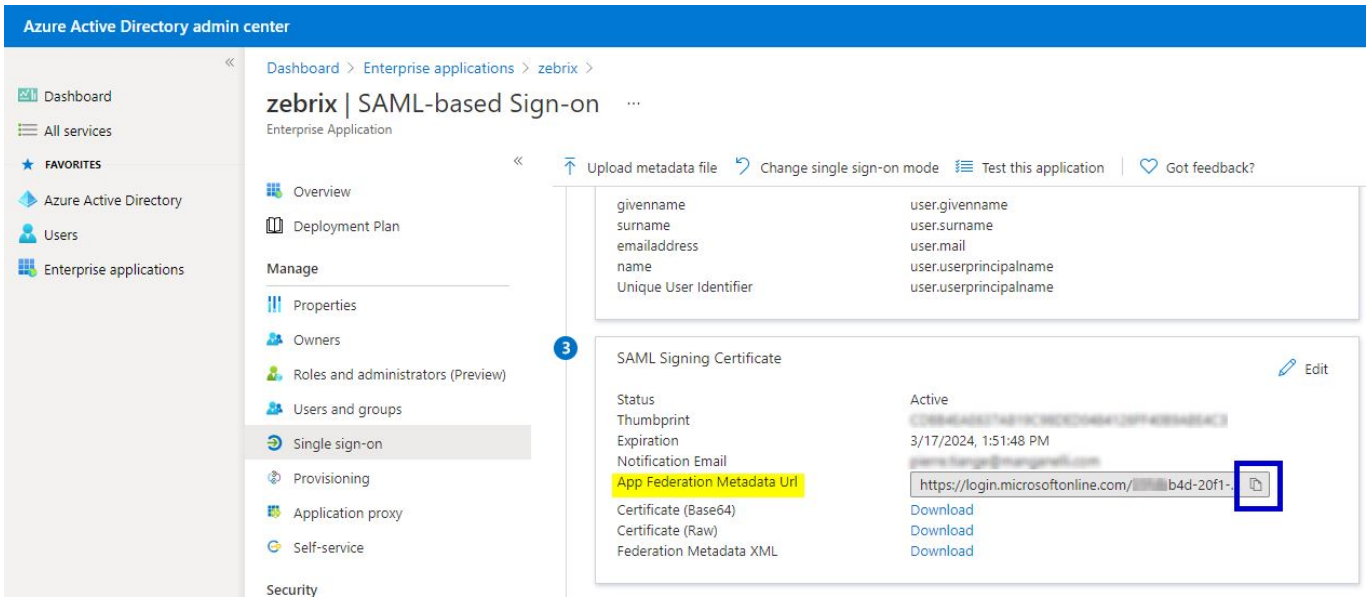

Add a new claim

1. Use **displayname** as name
2. In the name space field please copy / paste the following namespace **http://schemas.xmlsoap.org/ws/2005/05/identity/claims**
3. In the dropdown list, select the value **user.displayname**
4. Press the **Save** button

Copy the "App Federation Metadata URL" and send it to support@zebrix.net

Our Technical team will implement your settings on zebrix side and activate to SSO on your account
