

# Samsung SSSP USB Firmware Upgrade

## SSSPv4 (Tizen) PMF, PHF

- Download the firmware :

[http://www.zebrix.net/downloads/T-HKMLAKUC\\_2043.1\\_USB.zip](http://www.zebrix.net/downloads/T-HKMLAKUC_2043.1_USB.zip)

- Unzip the file
- Rename the obtained folder to **T-HKMLAKUC**
- Move the folder to the root of your USB key
- Connect the USB key to your screen
- With the remote control : Menu > Support > Software Update > Update Now
- The firmware process will take a few minutes and your screen will reboot automatically

## For SSSP v3 (2015) DBE, DME, DHE, DME\_BR, UDE-P, UDE-S

- Download the firmware :

[DBE\\_DME\\_DHE\\_UDE-P\\_DME-BR\\_Main\\_T-GFSLE2AKUC\\_1033.6.zip](#)

- Unzip the file
- Rename the **T-GFSLE2AKUCRELUSB\_OU** folder to **T-GFSLE2AKUC**
- Move the folder to the root of your USB key
- Connect the USB key to your screen
- With the remote control : Menu > Support > Software Update > Update Now
- The firmware process will take a few minutes and your screen will reboot automatically

## For SSSP v2 (2014) DMD, DSD, DHD, UED

- Download the firmware :

[DMD\\_DSD\(40,48,55,65,75\)\\_DHD\(40,48,55\)\\_UED\\_WW\(except N.America,Korea\)Main\\_T-GFSLDWWC\\_1036.5.zip](#)

- Unzip the file
- Rename the unzipped folder to **T-GFSLDWWC**
- Move the folder to the root of your USB key
- Connect the USB key to your screen

- With the remote control : Menu > Support > Software Update > Update Now
- The firmware process will take a few minutes and your screen will reboot automatically

## For SSSP v2 (2014) DB22D (not DP!)

- Download the firmware :

[DBD\(22\)\\_WW\(except N.America,Korea\)Main\\_T-GFSLDDWWC\\_1035.0.zip](#)

- Unzip the file
- Rename the unzipped folder to **T-GFSLDDWWC**
- Move the folder to the root of your USB key
- Connect the USB key to your screen
- With the remote control : Menu > Support > Software Update > Update Now
- The firmware process will take a few minutes and your screen will reboot automatically

## For SSSP v2 (2014) DB10D

- Download the firmware :

[DB10D\\_WW\(except N.America,Korea\)Main\\_T-GFSLD1DWWC\\_1008.7.zip](#)

- Unzip the file
- Rename the unzipped folder to **T-GFSLD1DWWC**
- Move the folder to the root of your USB key
- Connect the USB key to your screen
- With the remote control : Menu > Support > Software Update > Update Now
- The firmware process will take a few minutes and your screen will reboot automatically
