2025/11/29 00:39 1/5 Timezone

Warning: this functionality is only available on devices running in V3

### **Timezone**

This guide explains how zebrix deals with time and more precisely the timezones.

#### **General information**

- Zebrix automatically sets the time in the screen at each startup. (It is therefore unnecessary to adjust the time via the screen menu)
- The time displayed in the menu is always set to GMT (Greenwich Mean Time +00h00) whatever the timezone that is choosen.
- Zebrix is in charge of transforming the GMT time into the correct local time, thanks to the TimeZone configured on the CMS (see below)
- Go to "Hardware Tools" on the concerned device, then "Monitor". The local date/time of the screen corresponds to the time translated by zebrix which is the correct local time (GMT time + the time difference applied on it thanks to the timezone that has been choosen).
- The time that is displayed in a "date/time" zone on the pages assigned to the screen is identical to this local date.

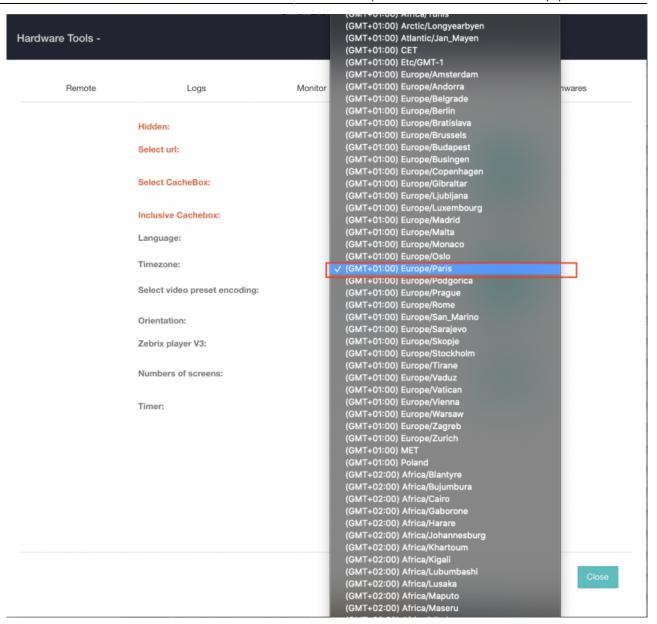

# How to change the time zone

This guide will explain how to change the time zone

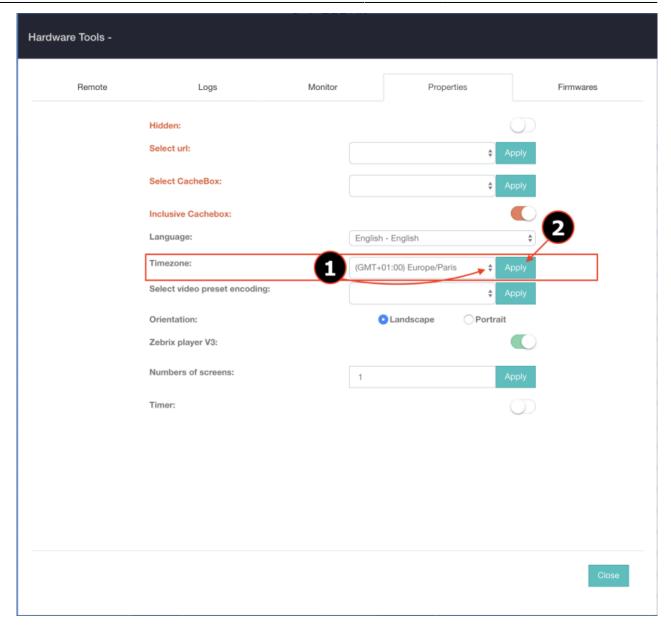

#### How to change the timezone on a screen

- · Select the screens on which you want to apply a different time zone
- · Click on "hardware tools"
  - 1. Go to the "properties" tab
  - 2. Select the desired time zone and click on apply

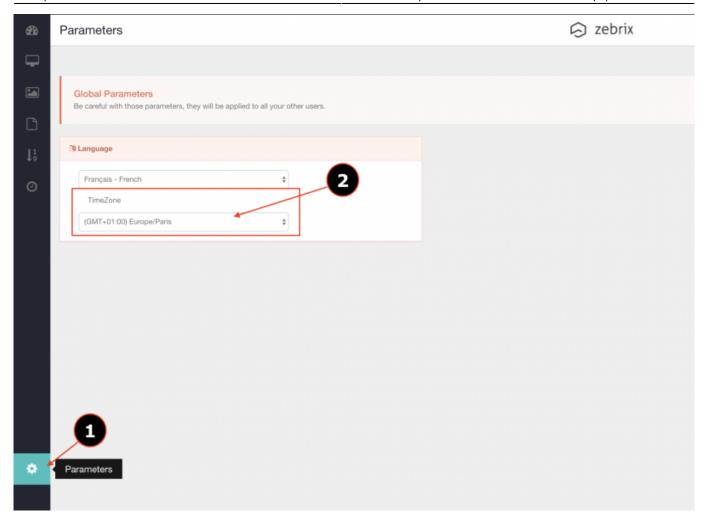

2025/11/29 00:39 3/5 Timezone

### How to change the time zone for a client's account

It is possible to change the time zone at the client level, this parameter will be used as the default time zone for all new screen/player added to this account.

- Go to the general account's parameters and select the desired time zone

## How to check the setting on a screen

1. Press the touch "Tools" on the remote control
