

# Widget Be Alert

## Access link

<http://widgets.zebrix.net/> in the news tab

## Specificities

The BeAlert widget allows you to broadcast on your screens the alerts issued by the Belgian government for the safety of its citizens. For more information, please visit [www.be-alert.be](http://www.be-alert.be). The alerts are broadcasted on the concerned geographical areas. So, to broadcast the right alerts on the right screens in the right areas, you need to determine the gps position of the screen (longitude, latitude) via the widget.

**On the site:** [www.coordonnées-gps.fr](http://www.coordonnées-gps.fr) You can get the GPS coordinates of your screen, from the postal address of the company where your screen is physically located.

## Coordonnées GPS

### Latitude et longitude d'une adresse

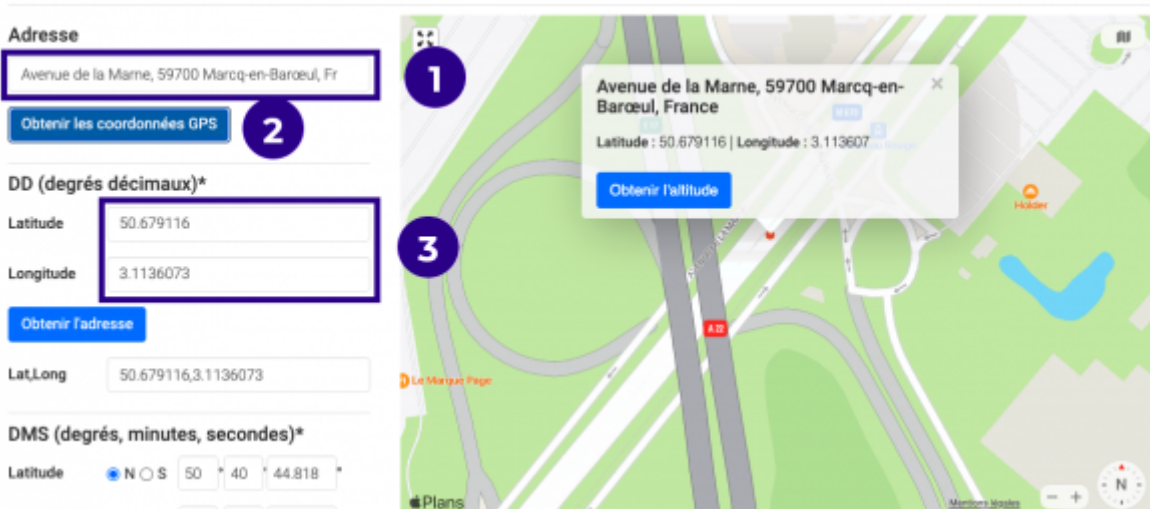

Remplir une adresse et cliquer sur le bouton "Obtenir les coordonnées GPS" pour afficher ses **latitude** et **longitude**. Vous pouvez consulter le résultat dans la colonne de gauche ou directement sur la carte. **Google Map** disponible sur la page itinéraire.

### Trouver l'adresse correspondant à des coordonnées GPS

**Adresse depuis latitude et longitude décimales** : Remplir les coordonnées décimales et cliquer sur le bouton "Obtenir l'adresse" correspondant.  
**Adresse depuis latitude et longitude sexagécimales** : Remplir les coordonnées sexagécimales et cliquer sur le bouton "Obtenir l'adresse" correspondant.

### Latitude, longitude et adresse d'un point sur la carte interactive

Cliquer directement sur la map interactive pour obtenir l'adresse et les coordonnées GPS du point cliqué. La latitude et la longitude sont affichées dans la colonne de gauche et sur la carte.

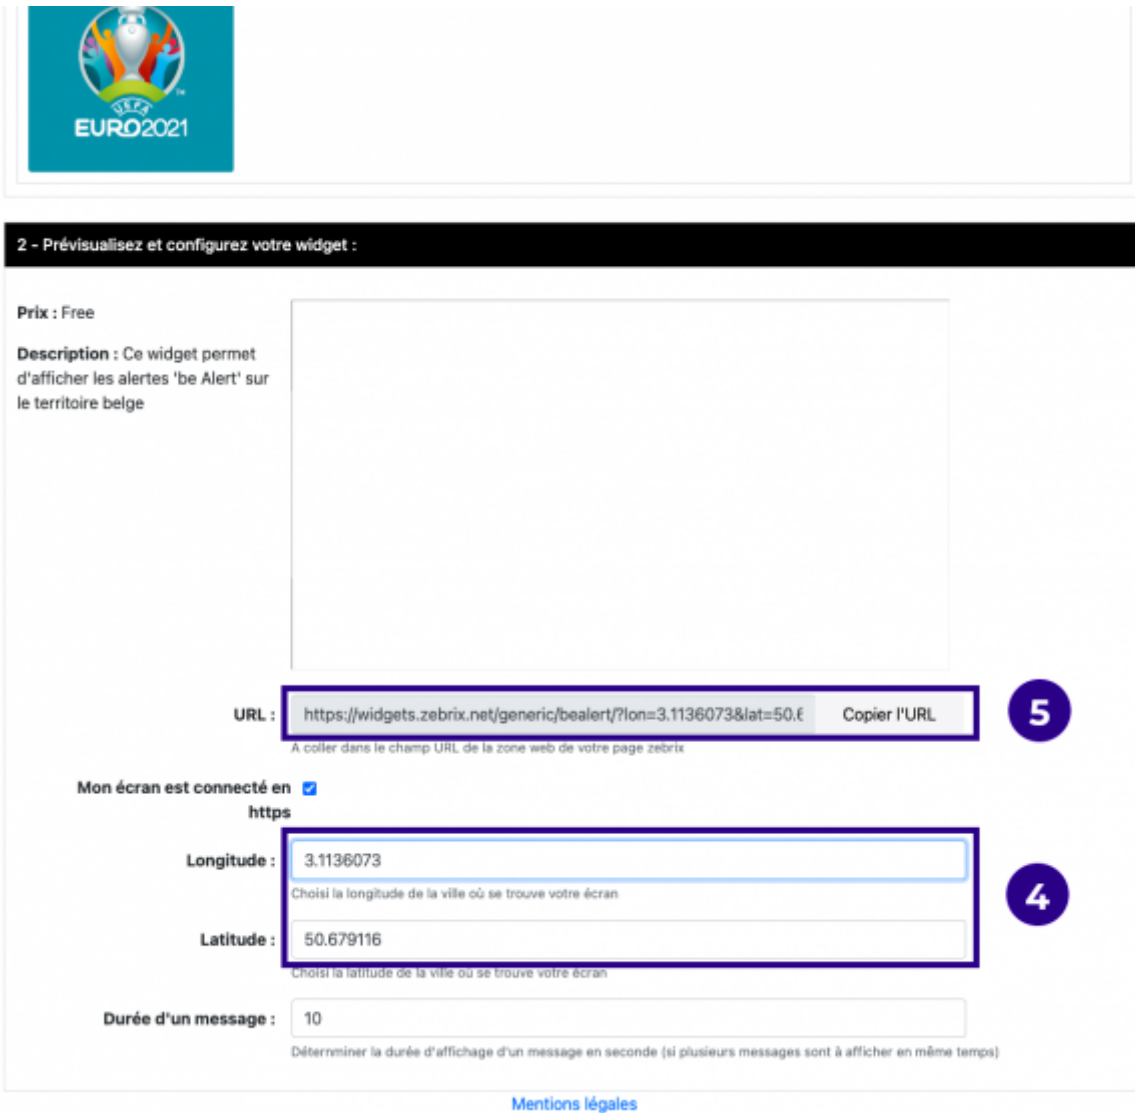

- 1 Enter the mailing address where the display is located.
- 2 Click on Get GPS Coordinates
- 3 Copy the longitudes and latitudes into the widget.

In the widget catalog

The screenshot shows the Zebrix website interface for selecting a widget. At the top, the Zebrix logo is visible. Below it, a navigation bar lists various widget categories: Calendar, Weather, SocialNetwork, Horoscope, Covid19, InfoTrafic, Compteur, Movies, News, QRcode, and Quizz. The 'News' category is highlighted, and a 'BeAlert' tooltip is shown above the 'be alert' widget thumbnail. The 'be alert' widget is selected, and its configuration page is displayed. The configuration page includes a price of 'Free', a description in French, a URL field with a 'Copier l'URL' button, a checkbox for 'Mon écran est connecté en https', and a 'Longitude' field with the value '4.351710'. A 'Mentions légales' link is also present.

Click on news and select the be-alert widget.

The screenshot shows the configuration page for the 'be Alert' widget. At the top left is the 'EURO2021' logo. Below it, a black header reads '2 - Prévisualisez et configurez votre widget :'. The main area contains the following fields:

- Prix :** Free
- Description :** Ce widget permet d'afficher les alertes 'be Alert' sur le territoire belge.
- URL :** A text field containing the URL `https://widgets.zebrix.net/generic/bealert/?lon=3.1136073&lat=50.679116` and a 'Copier l'URL' button. A blue circle with the number '5' is next to it.
- Mon écran est connecté en :** A checkbox that is checked, with 'https' selected below it.
- Longitude :** A text field containing '3.1136073'. Below it is the instruction 'Choisi la longitude de la ville où se trouve votre écran'. A blue circle with the number '4' is next to it.
- Latitude :** A text field containing '50.679116'. Below it is the instruction 'Choisi la latitude de la ville où se trouve votre écran'.
- Durée d'un message :** A text field containing '10'. Below it is the instruction 'Déterminer la durée d'affichage d'un message en seconde (si plusieurs messages sont à afficher en même temps)'.

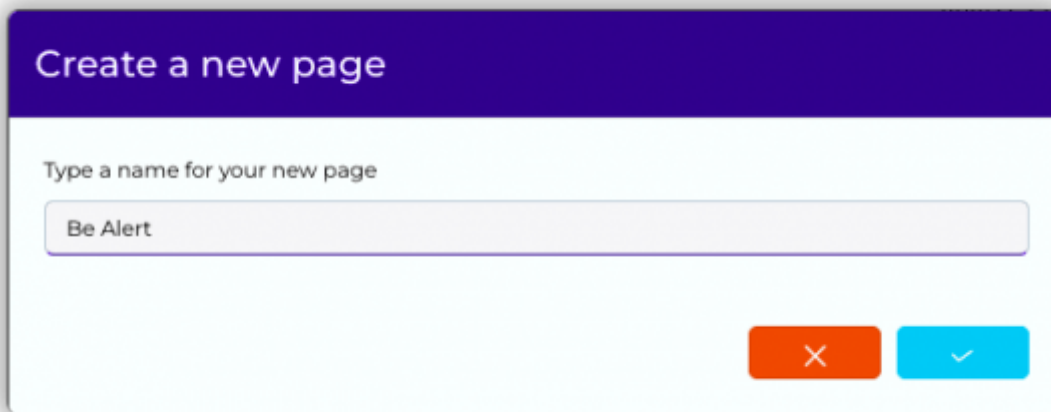

At the bottom center, there is a blue link labeled 'Mentions légales'.

- 4 paste the obtained GPS coordinates in longitude and latitude respectively.
- 5 copy the widget url

**Note:** It is more than likely that nothing is displayed in the preview, this is normal, it simply means that for the gps coordinates entered, there is no alert for the moment. On the other hand, the duration of a message will have an effect only if several alerts are given at the same time on the same area, it is the duration of each message in alternation, from 2 messages.

Then in the CMS, create a new page.

**In the page editor :**

Create:

- A portrait page, for portrait screens.
- A landscape page, for landscape screens.

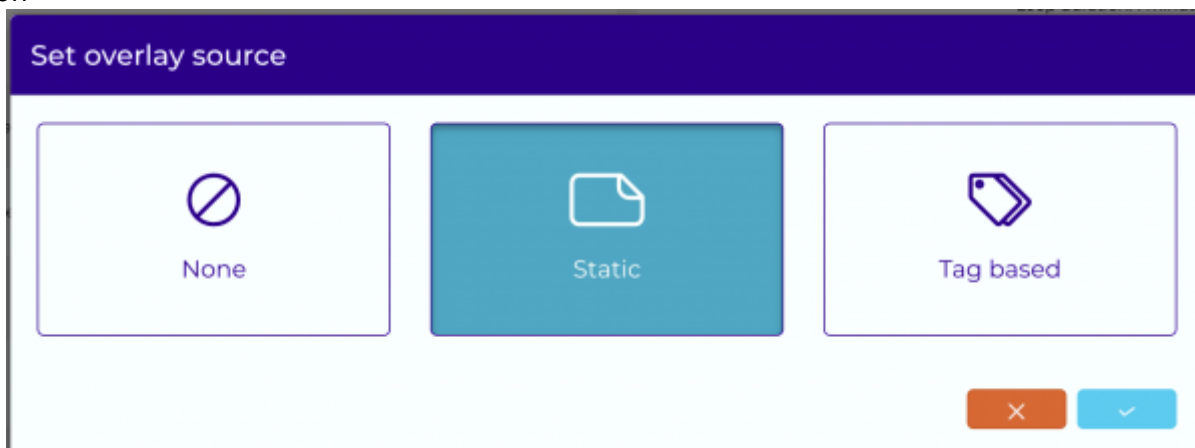

For an optimal display, you should add a web zone on the whole page. The display of the zone will be adapted on portrait and landscape screens. Then paste in the content area tab the url obtained in the widget catalog. Save your page.

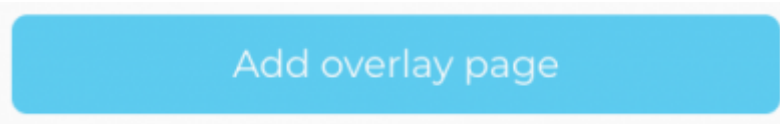

**In the playlist tab create or edit the playlist that you will broadcast with your be alert widget Press on**

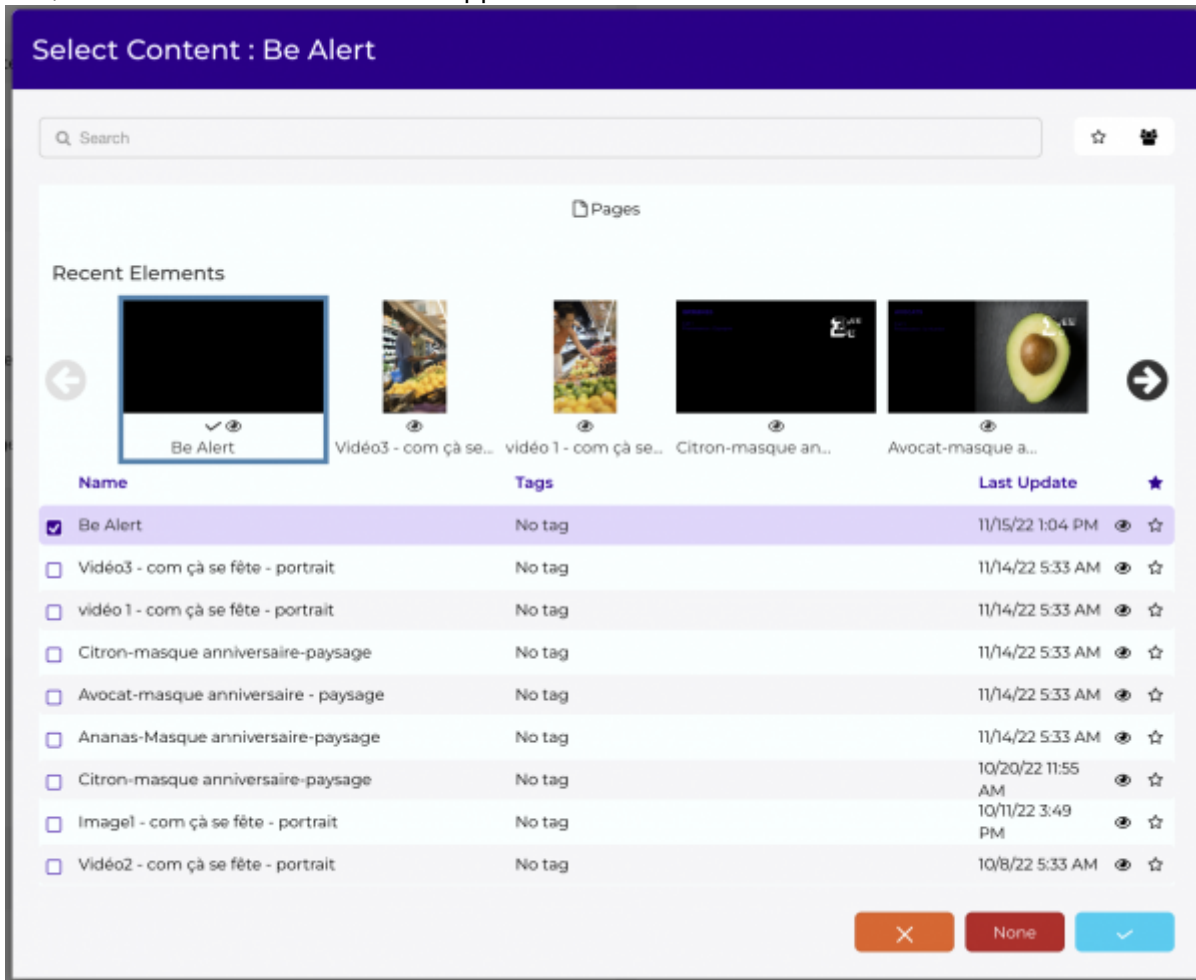

then on

click on static then ok to close the modal. Then click **save**. A new button **Add overlay page** appears under **change overlay type**

click on it, the content selection modal appears
