

Zebrix Screen Android shortcuts

Access the Shortcut Menu

For Android touchscreens, the shortcut menu can be accessed using the following combination:

Double tap on the top left corner of the screen.

Triple tap on the bottom left corner of the screen.

This menu allows access to:

- **Quick ID (display MAC address)**
- **Display technical information (tools)**

Unlock Additional Options

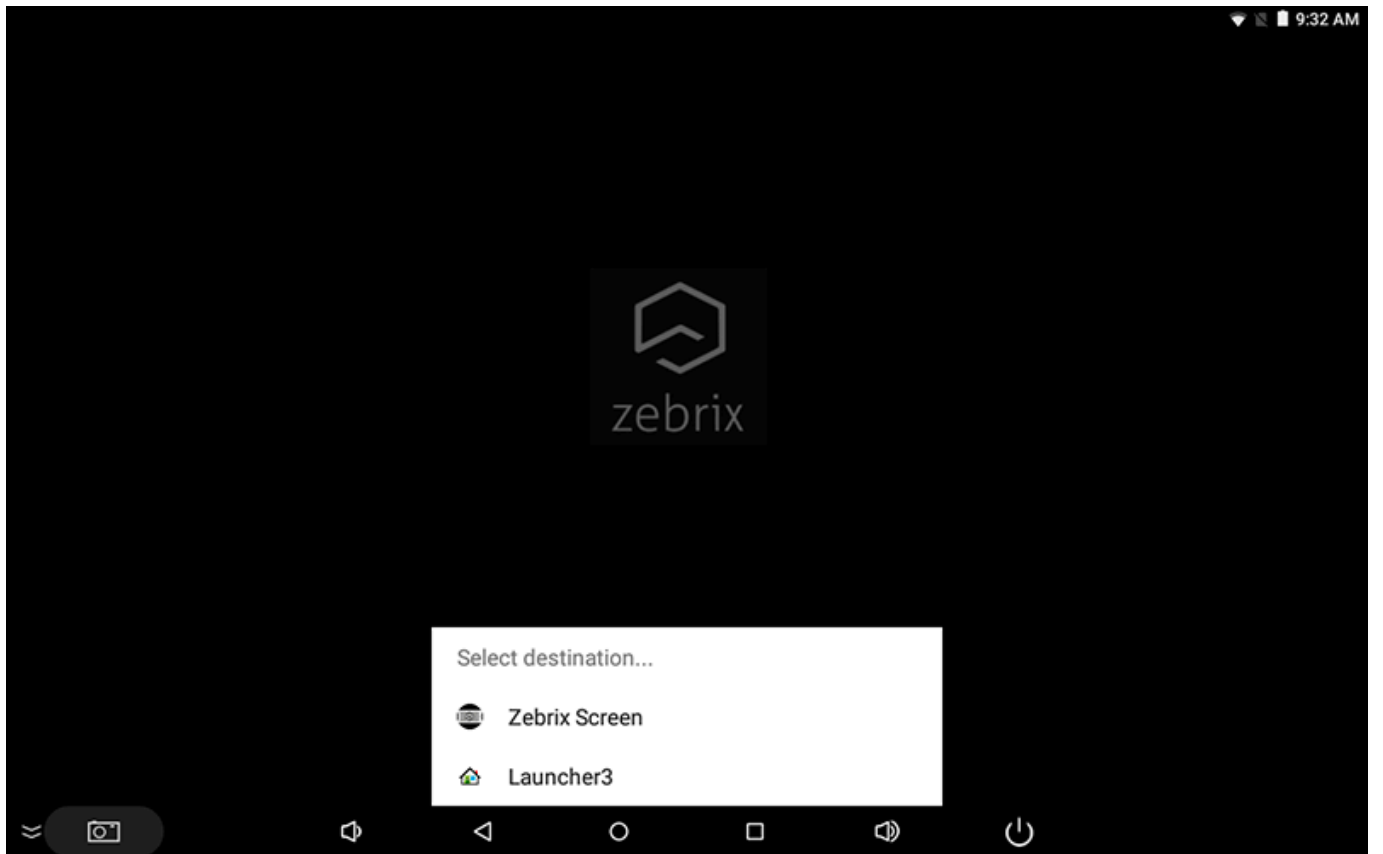

Within the shortcut menu, an icon with a key symbol is available.

Tapping on this icon and entering the default code **2181** unlocks three additional options:

- **Debug technical information**
- **Return to the configuration page**

- **Exit Kiosk mode**

Shortcuts for Non-Touchscreen Screens

For screens without touch functionality, the following shortcuts are available:

- **Quick ID:**

- **Press Enter on the keyboard**
- **OK on the remote control.**

- **Display technical information:**

- **Press I on the keyboard**
- **Info on the remote control.**

- **Debug technical information:**

- **Press Left + Right simultaneously on the keyboard**
- **Yellow + Blue buttons simultaneously on the remote control.**

- **Return to the configuration page:**

- **Press Backspace on the keyboard.**

- **Exit Kiosk mode:**

- Press the combination Arrow Up → Arrow Down → Arrow Left on the keyboard or remote control. ===
