zebrix mobile

What is zebrix mobile

zebrix mobile is a web application for iOS (iPhone / iPad) and Android that lets you control the content on your screens like a remote control.

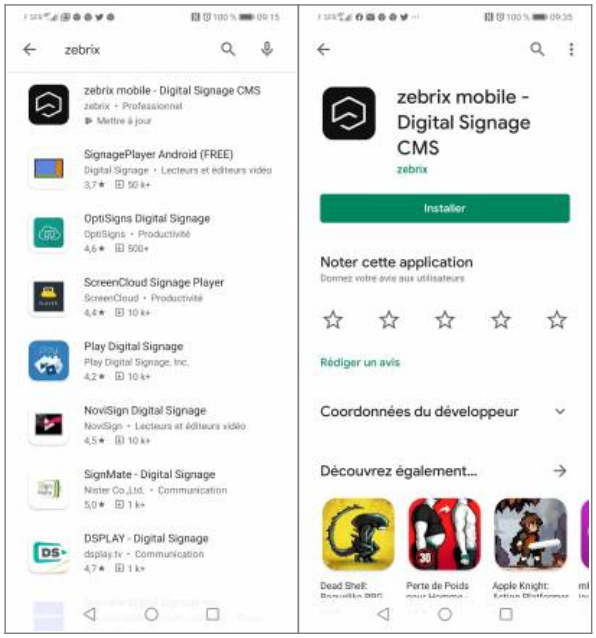

You can find zebrix mobile in Apple's AppStore or in the Google Play store.

Video

Application overview

Homepage

When you launch the application, you'll be taken directly to a login interface. ^Enter your username and password like this: ^In order to secure your mobile access, when you log in for the first time, you'll need to create a 4-digit PIN code, which you'll need to validate each time you log in^.

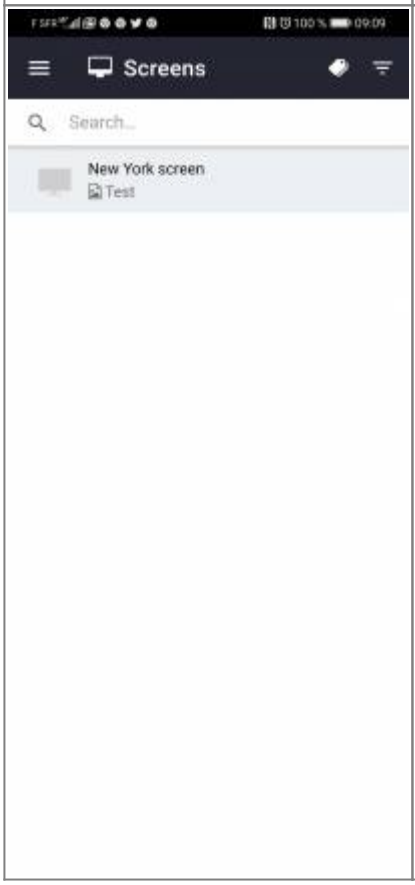

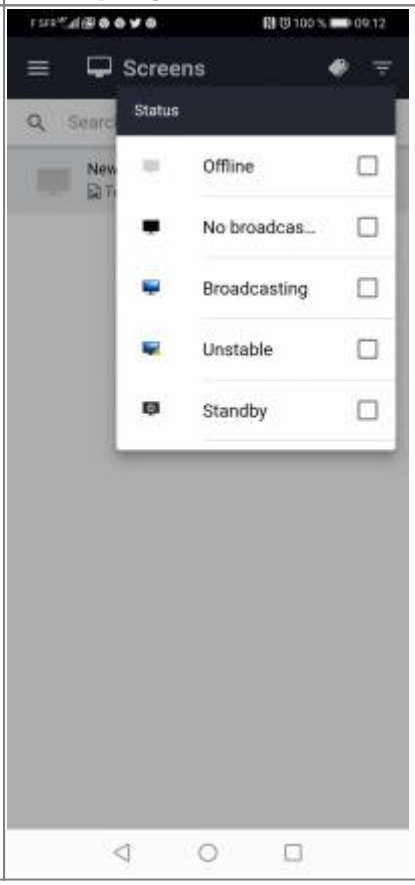

You can navigate between the different sections by pressing the button at the top left of the application.

Screens section

- Once you've logged in, you'll be taken directly to the “Screens” section, where you can manage your screens in the same way as on the classic web interface.

Default page	When you select a screen (press on the screen)	Press the “Filter” button at the top right
		

"Media" section

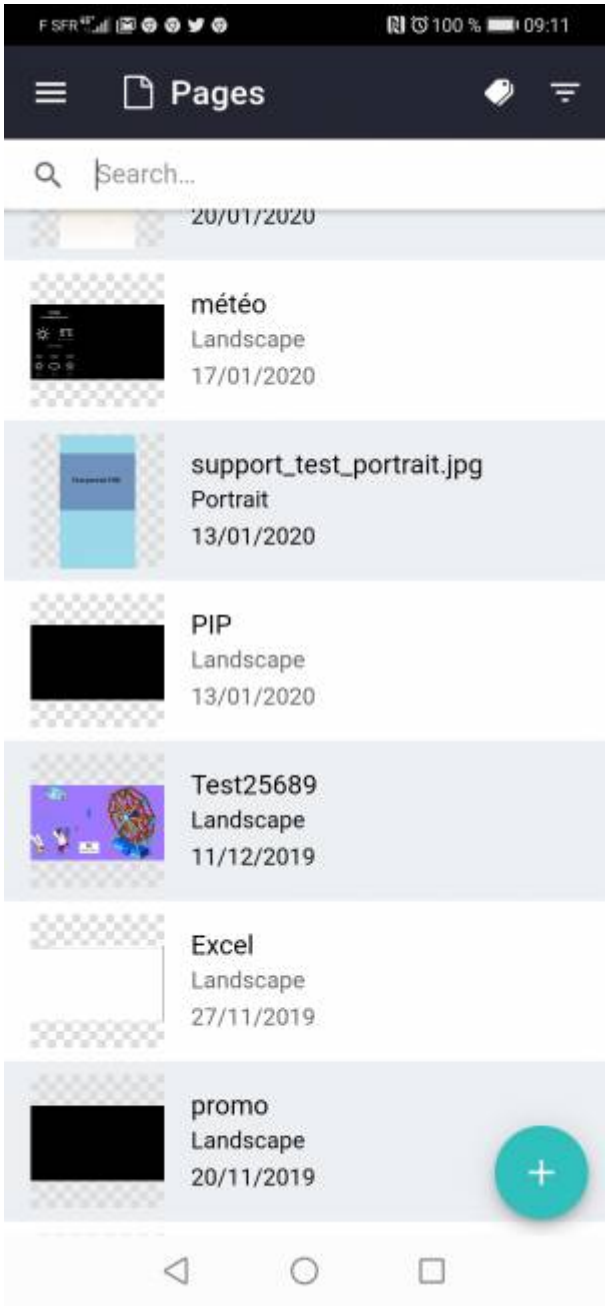

- This section allows you to add your own images and videos to your Zebrix account directly from your mobile phone.

"Pages" section

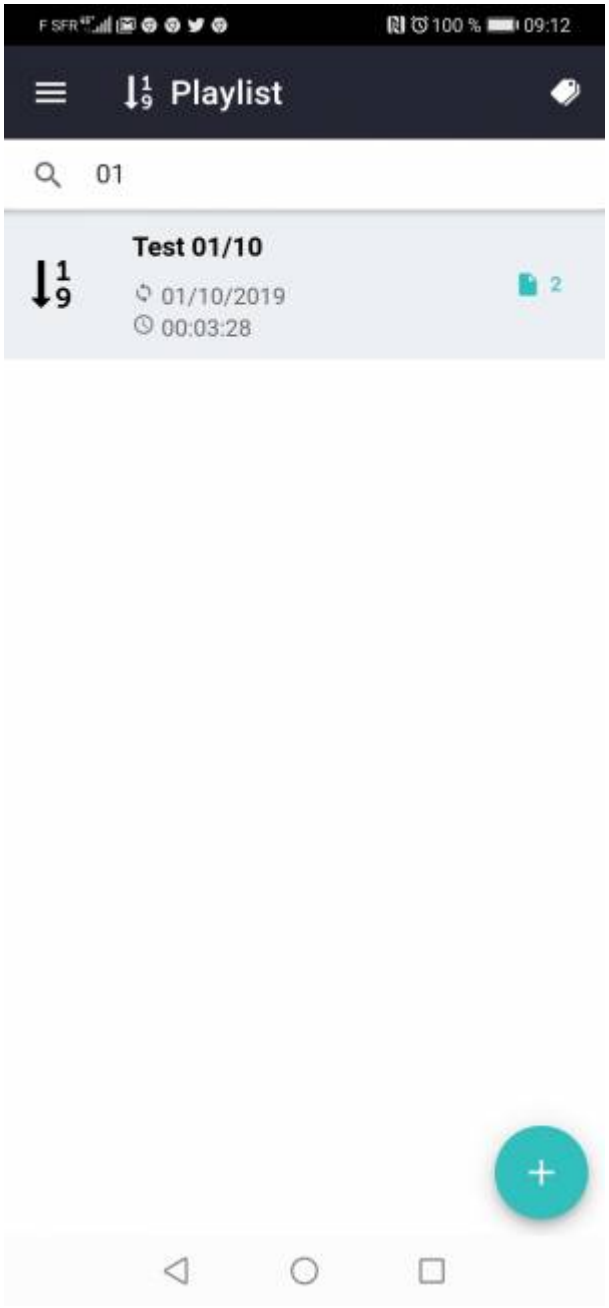

- This section allows you to modify your existing pages or create a new page.

Pages can only be created using templates created from the classic Zebrix web interface.

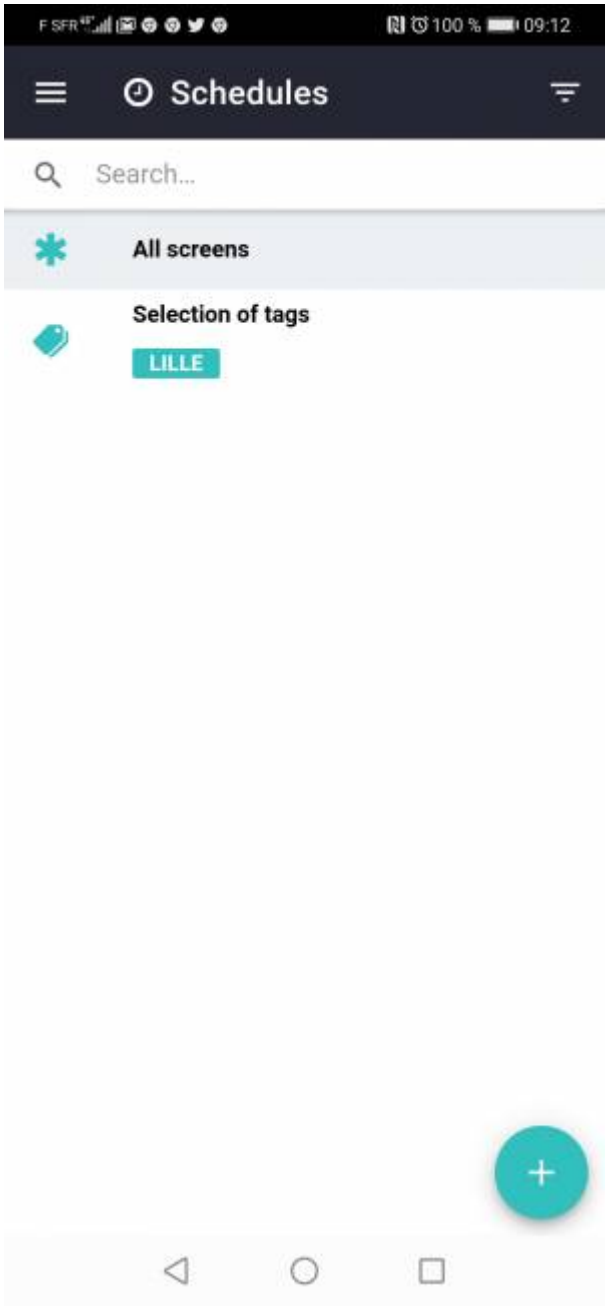

"Playlist" section

- This section allows you to modify your existing playlists or create a new playlist.

"Planning" section

- This section allows you to modify your existing schedules or create a new schedule.
