# Progress indicator area

The progress indicator zones are used to display on screen the progress of the pages as they scroll through the playlist. This can be an indication of pagination with numbers (page numbering with numbers on the total number of pages), with dots, a bar or a progress circle. These zones should be added to a page as an overlay, to partially cover all the pages in the playlist presented.
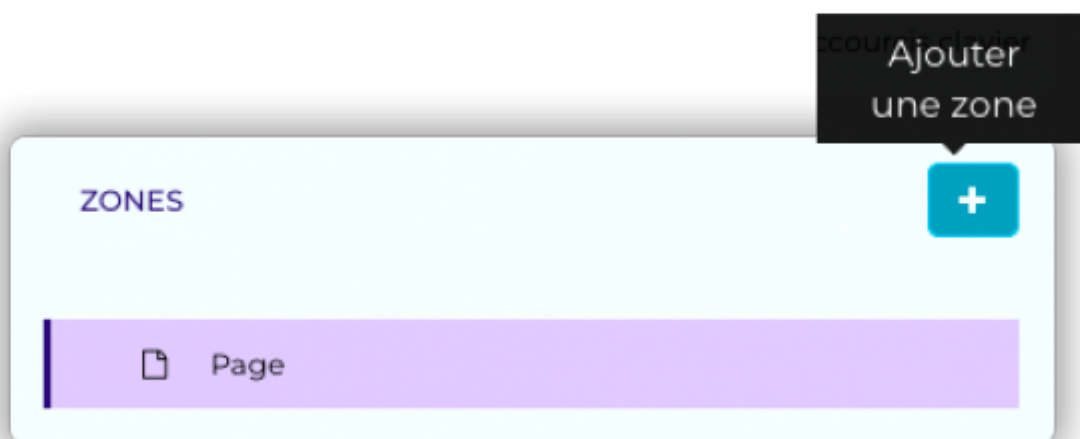

Procedure

To add a progress indicator, first create a new page in the page tab by pressing the button :

Name the page and confirm.

Then create a new zone by clicking on the + button

In general properties for the zone, choose a progress indicator.

In zone content>type, You have a choice of different types of indicator:

- Current position in the playlist with a number, indicates the number of pages in the playlist as well as the pagination of the current page.

In this indicator, you can decide whether or not to display the number of pages, the pagination and choose the separator between the two pieces of information. You can also choose whether the pagination is displayed as a counter or a countdown.

- Current position in the playlist with dots, indicates the number of pages in the playlist using a set of dots, while the page currently displayed is indicated by highlighting a dot in the list (first page, first dot, fifth page, fifth dot).

- Playlist progress bar: displays a progress bar for the playlist (like a loading bar), there is also a numerical counter for the playlist which can be used to control the display.
